

LOC Process Change

Question	Response
LOC Compliance Dates Transition	
<p>What is the date in the LOC Implementation Date field for annual LOC redeterminations which already fall within the 90 days prior to the ISP implementation date?</p>	<p>See example below. This LOC Implementation Date field will auto populate with the IHP/ISP date from CIMOR. The LOC determination date is 04/02/18, which is within the 90 days prior to the ISP implementation date of 05/01/18, therefore this LOC is in compliance with the new process.</p> <p>Note: In the example below, the IHP implementation date had <u>not</u> been updated in CIMOR to the 2018 implementation date, therefore the implementation date on the LOC had to be changed from 2017 to 2018. Changing this Implementation Date on the LOC will require a comment in the comment box.</p> <p>Determination Type: <input type="radio"/> Initial <input checked="" type="radio"/> Redetermination <input type="radio"/> Significant Change Determination Date: 04/02/2018</p> <p>Implementation Date Comment: <input type="text" value="LOC implementation date changed to align with IHP implementation date"/> Implementation Date: <input type="text" value="05/01/2018"/></p>
<p>What date is entered in the LOC Implementation Date field for annual redeterminations which do not fall within the 90 days prior to ISP implementation date during this transition year?</p>	<p>The Determination Date and Implementation Date would be the same date. The Implementation Date will need to be updated as it is auto populated with the IHP implementation date from CIMOR. An additional LOC will then need to be completed to align with the new process of 90 days prior to ISP implementation date.</p>
<p>If the ISP implements June 1, 2018, and the last LOC was completed May 1, 2017, will the LOC have to be completed prior to</p>	<p>No. If the annual LOC redetermination date already falls within the 90 days prior to ISP implementation date, then this is in compliance with the new process. In this example, the LOC redetermination could be completed anytime during that 90 days prior to June 1, 2018. This LOC implementation date would be June 1, 2018.</p>

<p>May 1, in order to comply with both the 365 days requirement and the within 90 days prior to ISP implementation date requirement?</p>	
<p>Initial/Significant Change LOCs</p>	
<p>What date is entered in the LOC Implementation Date field for an Initial or Significant Change LOC?</p>	<p>See example below. The Determination Date and Implementation Date would be the same date.</p> <p>Determination Type: <input type="radio"/> Initial <input type="radio"/> Redetermination <input checked="" type="radio"/> Significant Change Determination Date 04/02/2018</p> <p>Implementation Date Comment: <input type="text" value="LOC implementation date changed to align with the significant change determination date."/> Implementation Date <input type="text" value="04/02/2018"/></p>
<p>Annual Redetermination LOC</p>	
<p>Is the LOC Implementation date always the same date as the ISP Implementation date for an annual LOC redetermination?</p>	<p>Yes. LOC Implementation dates for annual LOC redeterminations will be the same date as the ISP Implementation date.</p>
<p>Formal Assessments</p>	
<p>Have the requirements for the formal assessments (e.g. MOCABI/Vineland) changed with the new LOC annual redetermination process?</p>	<p>No. Formal assessments continue to be completed within two years (730 days) of the LOC Determination Date.</p>
