2021 Sibling Leadership Network National Conference Program

June 18 -19, 2021
Strength Through Connection

This virtual Sibling Leadership Network (SLN) conference is scheduled for June 18 & 19, 2021, with post-conference sessions offered on June 22, 23, and 24.

Recently, the needs, opportunities, and challenges for families of people with disabilities have changed significantly. The 2021 National SLN Conference will examine what this means for siblings of people with disabilities. The SLN Conference is a unique event that helps to grow the sibling movement by bringing together siblings of people with disabilities and sibling supporters (parents, relatives including people with disabilities and professionals). Attendees at the conference will connect and learn about the sibling experience, hear from national experts on sibling services and supports, explore new research initiatives, learn about pressing issues related to COVID-19, and learn about advocacy opportunities.
