## **Community Life Engagement Guidepost Fidelity Scale**

The Institute for Community Inclusion (ICI) has developed a fidelity scale for providers to evaluate how close their day services and supports align with the four guideposts of Community Life Engagement. The fidelity scale was developed through a national panel of experts.

ICI is seeking providers who would be willing to help validate the fidelity scale. The level of effort for this activity is approximately 30 minutes. In turn, ICI will offer the provider early access to their online training module on Community Life Engagement.

You can learn more about this project, how to apply and participation requirements at [Community Life Engagement Guidepost](#).
