

WEBVTT

1 "Holly Reiff" (758284544)
00:00:00.000 --> 00:00:07.740

Put these webinars together for us, so we can share information and present to our stakeholders. It's.

2 "Holly Reiff" (758284544)
00:00:07.915 --> 00:00:19.495

Hugely important and helps everyone, um, stay in the same book I heard recently everyone needs to be in the same book, even if they're not on the same chapter, which I just I loved that. Um, so good afternoon.

3 "Holly Reiff" (758284544)
00:00:19.495 --> 00:00:29.845

Everyone this is the lunch in line for September 13th, 2022, and we are going to do part 2 of our assistive technology, remote support services today. technology remote support services today

4 "Holly Reiff" (758284544)
00:00:30.210 --> 00:00:44.730

An outline for a little bit of today is we're going to start with the overview of what remote support systems are, how to utilize the service for remote supports and some of our contracted providers.

5 "Holly Reiff" (758284544)
00:00:48.630 --> 00:01:01.410

Most sports are great way for individuals to receive the support needed in a way that allows them to build skills. Confidence and independence. R. D. H. D providers work within 2 main systems.

6 "Holly Reiff" (758284544)
00:01:01.410 --> 00:01:07.830

Those with a response center, and those who utilize a dashboard with custom alerts.

7 "Holly Reiff" (758284544)
00:01:08.335 --> 00:01:21.655

The response center reviews, the system sensors and response based on the parameters in the ISP, the individualized support plan, these response centers are supported by staff of the remote support agency.

8 "Holly Reiff" (758284544)
00:01:22.315 --> 00:01:36.985

The dashboard and custom alerts work the same. However, the respondent can be either paid or unpaid supports both systems also require a 2nd responder who must be able to reach the individual's home within 20 minutes.

9 "Holly Reiff" (758284544)
00:01:37.050 --> 00:01:41.310

This responder is typically a community support provider staff.

10 "Holly Reiff" (758284544)

00:01:41.310 --> 00:01:46.260
Our natural support, the systems can grow adapt.

11 "Holly Reiff" (758284544)
00:01:46.260 --> 00:01:58.770
And move with the individual, this service is not just limited to 1 ability level and can be highly customizable. It is available in any natural home setting.

12 "Holly Reiff" (758284544)
00:01:58.770 --> 00:02:02.850
Including those individuals who participate in the self directed service program.

13 "Holly Reiff" (758284544)
00:02:02.850 --> 00:02:09.810
Since the sensors are always gathering data, remote support systems can find patterns.

14 "Holly Reiff" (758284544)
00:02:09.810 --> 00:02:13.800
That allow individuals to get proactive support.

15 "Holly Reiff" (758284544)
00:02:15.120 --> 00:02:20.670
From and share more information with their circle of support, including medical.

16 "Holly Reiff" (758284544)
00:02:20.670 --> 00:02:29.130
And psychiatric teams, so 1 of the things we've recently discovered is that some folks who have overnight seizures.

17 "Holly Reiff" (758284544)
00:02:29.130 --> 00:02:40.110
And utilize a bed sensor, we're finding that they're having more or less seizures than what we thought. So now they can work with their neurologist to get the support. They need to ensure.

18 "Holly Reiff" (758284544)
00:02:40.110 --> 00:02:43.440
Their seizures are under control.

19 "Holly Reiff" (758284544)
00:02:43.440 --> 00:02:51.720
Please remember a 9,999 assistive technology coast should always have a modifier.

20 "Holly Reiff" (758284544)
00:02:51.720 --> 00:03:05.220
The modifier for remote support system is the G. T modified and remote supports includes all components of the service, including the initial consultation, and any ongoing education and support.

21 "Holly Reiff" (758284544)
00:03:05.220 --> 00:03:11.100
Assistive technologies are specific to the individual and will need to be just from the ISP.

22 "Holly Reiff" (758284544)
00:03:11.100 --> 00:03:14.280
Remote sports also require a risk assessment.

23 "Holly Reiff" (758284544)
00:03:14.280 --> 00:03:23.700
And due process review, the risk assessment tool tool is available on the website and is used to identify any gaps.

24 "Holly Reiff" (758284544)
00:03:23.700 --> 00:03:27.390
There could be, um, to.

25 "Holly Reiff" (758284544)
00:03:27.390 --> 00:03:35.190
Any gaps that could be there that need to be bridged to make the remote sports work better for the individual.

26 "Holly Reiff" (758284544)
00:03:35.190 --> 00:03:43.200
When completing the due process review, please ensure that all the sections are accounted for and complete.

27 "Holly Reiff" (758284544)
00:03:43.200 --> 00:03:47.010
Assistive technology.

28 "Holly Reiff" (758284544)
00:03:47.010 --> 00:03:50.130
Is not a bidding process.

29 "Holly Reiff" (758284544)
00:03:50.130 --> 00:03:57.540
Remote support providers are as unique as our residential, and they have providers and team should really review what supports are needed.

30 "Holly Reiff" (758284544)
00:03:57.540 --> 00:04:00.720
And then choose the provider who best supports the individuals.

31 "Holly Reiff" (758284544)
00:04:00.720 --> 00:04:03.810
Needs and concerns.

32 "Holly Reiff" (758284544)
00:04:04.860 --> 00:04:11.130
I'm trying to slow down a little bit so we have time to get our panelists on it and it looks like we have.

33 "Holly Reiff" (758284544)
00:04:11.130 --> 00:04:19.470
Both agencies who are going to be joining us today on board. So we have 7 remote support providers, contracted with damage TD.

34 "Holly Reiff" (758284544)
00:04:19.470 --> 00:04:33.689
And the 2 that are joining us today are safe and home and smart care 2 providers who are not able to join us today are together, tech and rest assured and additional information about their services can be found on our dmhc website.

35 "Holly Reiff" (758284544)
00:04:34.914 --> 00:04:48.444
On the technology 1st page under assistive technology surfaces, and I am dropping that link in the chat for everyone. Um, and if you wouldn't mind dropping the email in the chat too, I would appreciate that.

36 "Holly Reiff" (758284544)
00:04:48.474 --> 00:04:52.404
I skipped that on earlier slide. Um, so.

37 "Holly Reiff" (758284544)
00:04:53.459 --> 00:05:01.559
This is where we're going to end our slideshow and allow our panelists to pull up either their slide deck or.

38 "Holly Reiff" (758284544)
00:05:01.559 --> 00:05:06.209
To have the floor. So Scott, would you like to go? 1st?

39 "Holly Reiff" (758284544)
00:05:08.724 --> 00:05:09.024
Sure.

40 "Holly Reiff" (758284544)
00:05:10.224 --> 00:05:10.614
2nd,

41 "Scott Mosher" (3961018112)
00:05:33.834 --> 00:05:34.524
do I get.

42 "Holly Reiff" (758284544)
00:05:34.979 --> 00:05:42.389
Share here that needs to end our slide show and then you'll be able to pull up yours.

43 "Holly Reiff" (758284544)
00:05:58.169 --> 00:06:04.139
Looks like she's working on it. There. We go.

44 "Holly Reiff" (758284544)
00:06:04.139 --> 00:06:15.719

Give you the folder I like to when Webex has the ball, it's a lot more fun to pass the ball around than it is to pass the folder. Right?

45 "Holly Reiff" (758284544)
00:06:16.949 --> 00:06:23.189

You should be good to go. There's a share button at the bottom. If you're not as familiar with Webex.

46 "Holly Reiff" (758284544)
00:06:25.469 --> 00:06:29.129

Asked me to open system preferences after I do that.

47 "Scott Mosher" (3961018112)
00:06:31.739 --> 00:06:34.859

Not really what I want to do.

48 "Holly Reiff" (758284544)
00:06:34.859 --> 00:06:39.749

Um.

49 "Holly Reiff" (758284544)
00:06:39.749 --> 00:06:48.509

My name's Scott, I'm a smart care. Smart is designed to be, uh, a very non intrusive system.

50 "Holly Reiff" (758284544)
00:06:48.509 --> 00:06:51.839

So, it's a series of sensors placed throughout the home.

51 "Holly Reiff" (758284544)
00:06:51.839 --> 00:07:02.279

That the client generally does not, uh, even notice that there, they're generally little white boxes. We monitor activities of daily living. So your sleeping patterns.

52 "Scott Mosher" (3961018112)
00:07:02.279 --> 00:07:06.629

You're eating patterns, uh, your bathroom patterns are showering patterns.

53 "Scott Mosher" (3961018112)
00:07:06.629 --> 00:07:10.799

And it also sends out notifications to.

54 "Scott Mosher" (3961018112)
00:07:10.799 --> 00:07:16.769

Whoever needs to get those notifications and that can be the provider. The neighbor, the family, the Guardian.

55 "Holly Reiff" (758284544)
00:07:16.769 --> 00:07:20.909

Any notification you want, for example, if they have.

56 "Scott Mosher" (3961018112)

00:07:20.909 --> 00:07:30.239

Left in the middle of the night, or they left the stove on, or, uh, they haven't showered in a few days, or have not taken their medication or if they took their medication.

57 "Scott Mosher" (3961018112)

00:07:30.239 --> 00:07:35.099

All of those types of notifications can be set up to go to anybody.

58 "Holly Reiff" (758284544)

00:07:35.099 --> 00:07:39.329

They can be set up to go to different people at different times for different shifts.

59 "Holly Reiff" (758284544)

00:07:39.329 --> 00:07:47.219

It's an easy to use system. Um, the demo is my dot smart care system.

60 "Kat Craig" (2346440704)

00:07:47.219 --> 00:07:50.459

Dot com and.

61 "Kat Craig" (2346440704)

00:07:50.459 --> 00:07:56.999

Uh, the password for that is demo, all small work and the, and the login is demo all small letters.

62 "Kat Craig" (2346440704)

00:07:56.999 --> 00:08:02.399

What people really like about the system? Is that not only? Is it not intrusive?

63 "Scott Mosher" (3961018112)

00:08:02.399 --> 00:08:06.869

But there are no wearables required and no camera is required.

64 "Scott Mosher" (3961018112)

00:08:06.869 --> 00:08:12.689

So the person doesn't have to wear anything. 1st, the person generally doesn't know that the system there.

65 "Scott Mosher" (3961018112)

00:08:12.689 --> 00:08:19.169

For the most part is just monitoring your activities. The other thing that people really like is the, um.

66 "Scott Mosher" (3961018112)

00:08:19.169 --> 00:08:23.849

The report that comes out, uh, it gives you, uh, weekly.

67 "Scott Mosher" (3961018112)

00:08:23.849 --> 00:08:32.489

Look at the trends of the person. So is the person sleeping all night? Are they sleeping in every day? Are they going to the bathroom? 12 times a night?

68 "Scott Mosher" (3961018112)

00:08:32.489 --> 00:08:38.939

So, it really does a good job of helping the persons stay active.

69 "Scott Mosher" (3961018112)

00:08:38.939 --> 00:08:42.629

It's really designed for someone who is fairly active.

70 "Scott Mosher" (3961018112)

00:08:42.629 --> 00:08:49.049

Fairly independent, um, really to help them maybe through the night not have to have someone there.

71 "Scott Mosher" (3961018112)

00:08:49.049 --> 00:08:52.529

And so that's the goal of smart. Yeah.

72 "Scott Mosher" (3961018112)

00:08:52.529 --> 00:09:04.289

My number is 664. 858365andyou can reach me at Scott that Moshe at smart care system dot com.

73 "Scott Mosher" (3961018112)

00:09:04.289 --> 00:09:17.909

Okay, thank you, Scott. And for those of you online, Scott, if you want to send me your slides later, we can incorporate them and then they can be posted with our, um.

74 "Scott Mosher" (3961018112)

00:09:17.909 --> 00:09:26.819

Presentation, so we usually have a recording of the presentation and recording of the slides so we can, we can add those slides and, um, and the.

75 "Scott Mosher" (3961018112)

00:09:26.819 --> 00:09:32.309

Web address that I dropped in the chat box earlier you can see a presentation with Scott.

76 "Scott Mosher" (3961018112)

00:09:32.309 --> 00:09:43.019

Um, in in that same location on our website and information about where to find that the, your web address in that demo.

77 "Scott Mosher" (3961018112)

00:09:43.019 --> 00:09:46.109

A password as well Thank you.

78 "Scott Mosher" (3961018112)

00:09:47.879 --> 00:09:55.829

You also, Scott put your the information that you gave your email address name phone number as well in the chat box.

79 "Scott Mosher" (3961018112)
00:09:55.829 --> 00:09:59.009
Sure.

80 "Scott Mosher" (3961018112)
00:09:59.009 --> 00:10:10.559
Leslie is our provider representative from our other provider being featured today safe in home so, Leslie, would you like to tell us a little bit about.

81 "Scott Mosher" (3961018112)
00:10:10.559 --> 00:10:16.589
Safe at home services and that makes sense, um, unique to our DD services.

82 "Scott Mosher" (3961018112)
00:10:18.959 --> 00:10:33.264
Yes, hi. Good afternoon. I did not present a PowerPoint. I was just going to talk and show a couple of the devices, but, um, I'm also happy to to email a PowerPoint just that gives a little more information.

83 "Scott Mosher" (3961018112)
00:10:33.534 --> 00:10:47.064
So I'm going to keep it short and sweet today. But, um, I'm actually so on the schedule, it said, Jared Hendricks, he's our district manager, but he's actually in Washington for the week. So, um, you get me instead.

84 "Scott Mosher" (3961018112)
00:10:47.729 --> 00:10:58.979
But, um, there's actually 3 representatives in Missouri. It's myself. Um, Cathy, and then Alex Egor. Um, so we, we are all in Missouri.

85 "Scott Mosher" (3961018112)
00:10:59.304 --> 00:11:11.814
So safe at home, we are actually remote support and assistive technology provider. So we are currently in 15 States and still growing so safe and home.

86 "Holly Reiff" (758284544)
00:11:11.844 --> 00:11:23.424
We've, we've been been around and in different states. So, we have 2 support centers 1 in Arizona, 1 in California and it's 24 7 support. support

87 "Holly Reiff" (758284544)
00:11:24.084 --> 00:11:37.614
So, anyone can reach out to us any time in the 24 hours, or we also schedule check ins and we schedule reminders. So we really take a person center approach.

88 "Holly Reiff" (758284544)

00:11:37.614 --> 00:11:44.694

So, what we do is we have a consultation with the individual that support coordinator, family.

89 "Holly Reiff" (758284544)

00:11:44.694 --> 00:11:53.634

Whoever wants to be on that consultation and we look at what that individual needs for support what they, what the goals are. are

90 "Kat Craig" (2346440704)

00:11:53.729 --> 00:11:59.939

Working on, and then we put together a proposal and a plan that is specific to that person.

91 "Holly Reiff" (758284544)

00:12:01.074 --> 00:12:14.184

So, our remote support staff, they are trained in provider training and then they also have to take an act training, which is acceptance commitment therapy and that focuses on behavior.

92 "Holly Reiff" (758284544)

00:12:15.504 --> 00:12:23.784

So when someone reaches out to remote support or reach out to them, they are trained. And sometimes the behavior techniques really.

93 "Leslie Rounkles" (3168055040)

00:12:24.119 --> 00:12:30.029

You know, are important. Um, so what we do is we follow the care plan.

94 "Leslie Rounkles" (3168055040)

00:12:30.029 --> 00:12:41.609

Like I said, um, so remote supports will will do the check ins or reminders, but it's really unique to each individual. So I did, um, I did want to show this. This is just.

95 "Leslie Rounkles" (3168055040)

00:12:41.609 --> 00:12:45.269

The tablet that, um, we utilize.

96 "Leslie Rounkles" (3168055040)

00:12:45.269 --> 00:12:50.369

A lot in, in most cases with remote support so it's very simple.

97 "Leslie Rounkles" (3168055040)

00:12:50.369 --> 00:12:55.319

Very user friendly, easy to use. So the individual can just hit call.

98 "Leslie Rounkles" (3168055040)

00:12:55.554 --> 00:13:09.954

And they'll be connected to someone with our remote support staff and, um, typically, we try to keep it the same person, especially if we're doing every day check ins. But if they call, you know, it's 24 7.

99 "Leslie Rounkles" (3168055040)

00:13:09.954 --> 00:13:24.684

so, if they call, they might get somebody else. If they're calling in, so that's, that's kind of what it looks like. And then when when our remote support staff calls them, they just hit the button and then they see our remote support staff now for the assistant technology side.

100 "Leslie Rounkles" (3168055040)

00:13:24.684 --> 00:13:25.224

side

101 "Leslie Rounkles" (3168055040)

00:13:25.319 --> 00:13:28.619

We have over 60 devices, so, I mean, I could.

102 "Leslie Rounkles" (3168055040)

00:13:28.619 --> 00:13:32.459

Go over, talk about every device, but.

103 "Leslie Rounkles" (3168055040)

00:13:32.459 --> 00:13:41.069

It's not really not necessary. Like I said, we, we look at the individual, you know, and if it's in a case of of maybe needing, um.

104 "Leslie Rounkles" (3168055040)

00:13:41.069 --> 00:13:48.329

Some door window sensors may be just checking in. Maybe maybe they need medication reminders so we're going to put together.

105 "Leslie Rounkles" (3168055040)

00:13:48.329 --> 00:13:59.279

A medication dispenser, we're gonna, um, also support them with with the calls. So, you know, they have their medication dispenser, but we're also calling. So.

106 "Leslie Rounkles" (3168055040)

00:13:59.279 --> 00:14:02.699

Each each individual, so unique, so.

107 "Leslie Rounkles" (3168055040)

00:14:02.699 --> 00:14:15.564

With all the devices, and all the assistive technology, we just want to really take that person center approach and see what that individual really needs and then put the devices that are going to support their goals and them.

108 "Leslie Rounkles" (3168055040)

00:14:16.674 --> 00:14:24.804

So, that consultation is really important to get their needs and look at each individual person. Um.

109 "Leslie Rounkles" (3168055040)

00:14:25.169 --> 00:14:35.369

After we have that consultation the proposal, and after everything's approved, we have a field technician, a trained field technician who will go out install.

110 "Leslie Rounkles" (3168055040)

00:14:35.369 --> 00:14:43.229

All of the equipment and educate on how to use all the devices, use the tablet. And, um.

111 "Leslie Rounkles" (3168055040)

00:14:43.229 --> 00:14:53.969

The entire time that the person is on supports if anything happens needs updates, our field technician will take care of everything.

112 "Leslie Rounkles" (3168055040)

00:14:53.969 --> 00:15:08.459

So, a big part of us is the remote support side and just really trying to incorporate that to keep the individual's independents and work on their goals and be able to reach out to somebody. But not having somebody.

113 "Leslie Rounkles" (3168055040)

00:15:08.459 --> 00:15:13.199

Specifically, they're in the home, but still being able to reach out to somebody at any time.

114 "Leslie Rounkles" (3168055040)

00:15:13.674 --> 00:15:25.914

So that's kind of in a nutshell, a quick little overview. Um, but like I said, I'm happy to send a PowerPoint that kind of goes over everything, a little more in depth.

115 "Leslie Rounkles" (3168055040)

00:15:26.274 --> 00:15:29.394

I tried to keep this pretty short and sweet but, um.

116 "Leslie Rounkles" (3168055040)

00:15:30.414 --> 00:15:44.154

Yeah, I'm always here, Kathy Alex will answer any questions and we will help with any. But, um, oh, another, that I wanted to just show real quick is the giacom. This is another pretty common device that we use.

117 "Leslie Rounkles" (3168055040)

00:15:44.424 --> 00:15:50.574

And this can be used in the community or in the home. But this is able to be on a lanyard or on a belt.

118 "Leslie Rounkles" (3168055040)

00:15:51.294 --> 00:15:59.604

But it's a 2 way audio, and you can store 7 numbers in there, but they're able a person's able to reach out to somebody or they're able to.

119 "Leslie Rounkles" (3168055040)

00:15:59.724 --> 00:16:06.114

Reach out to them, and it has jps location. We have 1 individual he goes on walks. He takes us all gone walks a lot.

120 "Leslie Rounkles" (3168055040)

00:16:06.114 --> 00:16:15.864

He has gotten turned around so he was able to call remote support and they could see with the jps location tracking, and they were able to walk it back home.

121 "Leslie Rounkles" (3168055040)

00:16:15.984 --> 00:16:29.484

So, this can be used for multiple, you know, different different uses but good in the community. And you can wear it if you're a fall risk or if you're worried about falls. Um, like I said, there's so many different devices you can put in.

122 "Leslie Rounkles" (3168055040)

00:16:29.699 --> 00:16:33.059

Face it just really depends on the needs.

123 "Leslie Rounkles" (3168055040)

00:16:33.059 --> 00:16:39.029

And how the goals and support, so that's kind of it for safe and home. Mm. Hmm.

124 "Leslie Rounkles" (3168055040)

00:16:39.029 --> 00:16:42.209

Thank you Lesley. Yeah.

125 "Leslie Rounkles" (3168055040)

00:16:42.209 --> 00:16:49.199

I am really glad that, um, our 2 providers were able to join us today.

126 "Leslie Rounkles" (3168055040)

00:16:49.199 --> 00:16:53.159

Um, like, is that have more information on our.

127 "Leslie Rounkles" (3168055040)

00:16:53.159 --> 00:17:07.554

Dd web page, um, under our technology 1st, 10, um, to answer just a quick question that I saw pop up in the chat box. If the medication dispenser is the standalone equipment, not connected to someone's remote support service.

128 "Leslie Rounkles" (3168055040)

00:17:07.824 --> 00:17:21.384

That would be under a different assistive technology code. So, for example, we have pack for you, Spencer and dose health, which are both standalone medication administration systems. Excuse me?

129 "Leslie Rounkles" (3168055040)

00:17:21.654 --> 00:17:23.154

And those are both under our.

130 "Leslie Rounkles" (3168055040)
00:17:23.159 --> 00:17:28.769
Assistive technology a 9,999 you C code.

131 "Leslie Rounkles" (3168055040)
00:17:28.769 --> 00:17:32.099
So, I'm going to.

132 "Leslie Rounkles" (3168055040)
00:17:32.099 --> 00:17:35.339
Take over the ball here and.

133 "Leslie Rounkles" (3168055040)
00:17:35.364 --> 00:17:46.134
Go to our very last slide, um, we didn't didn't use as much time as we have in the past on our lunch and learn, but it's not our shortest to date either.

134 "Leslie Rounkles" (3168055040)
00:17:46.134 --> 00:17:54.384
I think our, our shortest record time for you to, at lunch line was about 7 minutes and that was when we were still 1st really new.

135 "Leslie Rounkles" (3168055040)
00:17:54.719 --> 00:17:57.929
So, I'm going to.

136 "Leslie Rounkles" (3168055040)
00:17:57.929 --> 00:18:01.619
To me this last 1 with you guys.

137 "Leslie Rounkles" (3168055040)
00:18:02.789 --> 00:18:07.319
To enter not here. Oh, it started back at the beginning again.

138 "Leslie Rounkles" (3168055040)
00:18:07.319 --> 00:18:11.039
Hello.

139 "Leslie Rounkles" (3168055040)
00:18:11.039 --> 00:18:19.739
While she's doing that, there was a question we have 1 question that popped up why you're trying to find that. Let me go ahead and read it.

140 "Leslie Rounkles" (3168055040)
00:18:19.739 --> 00:18:26.999
It says, did the devices come with a data plan built in also? Can you talk about how.

141 "Leslie Rounkles" (3168055040)
00:18:26.999 --> 00:18:31.229
You coordinate other providers in the home.

142 "Leslie Rounkles" (3168055040)

00:18:31.229 --> 00:18:35.729
So data well.

143 "Leslie Rounkles" (3168055040)
00:18:35.729 --> 00:18:40.979
Our remote support providers typically use 2 different.

144 "Holly Reiff" (758284544)
00:18:40.979 --> 00:18:51.744
Services, um, either it's cellular service, which doesn't require a data plan or WiFi, or it's WI, fi enabled for those who have WI, Fi, enabled systems.

145 "Holly Reiff" (758284544)
00:18:51.774 --> 00:18:56.993
It is the responsibility of the individual to have their own WI Fi service. Um.

146 "Holly Reiff" (758284544)
00:18:57.359 --> 00:19:10.824
The waiver cannot cover Internet or what? Wifi services, but there are some great resources to the FCC. And I believe we have some more resources coming up that I have been hearing about through the grapevine.

147 "Holly Reiff" (758284544)
00:19:10.824 --> 00:19:24.924
And when those are finalized, we'll be sharing this probably through an email blast and we'll definitely be talking to talking about them anytime you dad is around. But our final slide for today is just our upcoming dates.

148 "Holly Reiff" (758284544)
00:19:24.989 --> 00:19:37.469
So, just a reminder that our, next to you that lunch and learn, we'll be on October 11th at noon, and Shelly will be discussing more information about and universal design.

149 "Holly Reiff" (758284544)
00:19:39.084 --> 00:19:50.604
And then there's 2 other great webinars that are available as resources and you, which is all about, um, self, advocacy and R.

150 "Holly Reiff" (758284544)
00:19:50.604 --> 00:19:57.444
D services and how they connect as well as the no wrong door series, which is the collaboration between Missouri, 18 and.

151 "Holly Reiff" (758284544)
00:19:58.619 --> 00:20:02.249
And no wrong door series. Um, usually.

152 "Holly Reiff" (758284544)
00:20:03.419 --> 00:20:06.809
Uh, features technologies that can be used in every day.

153 "Holly Reiff" (758284544)
00:20:06.809 --> 00:20:17.909

And so it's very, um, very useful. They had a great 1 recently all about funding and it is the best resource I've seen about how to.

154 "Kat Craig" (2346440704)
00:20:17.909 --> 00:20:28.649

How to fund are different different technologies and where to go for more funding support. So, if you haven't seen that 1, I would highly recommend checking it out.

155 "Kat Craig" (2346440704)
00:20:31.499 --> 00:20:35.219

And that is our, um.

156 "Holly Reiff" (758284544)
00:20:36.329 --> 00:20:50.124

Sorry, I just saw something else that is, are you that lunch and learn for today? Um, I'm glad everyone was able to join us and I'm really glad to our 2 providers who are able to be here today.

157 "Holly Reiff" (758284544)
00:20:50.124 --> 00:20:52.134

And, of course, if you guys have any questions.

158 "Holly Reiff" (758284544)
00:20:52.559 --> 00:20:55.619

Always always always reach out to.

159 "Holly Reiff" (758284544)
00:20:55.619 --> 00:21:06.552

The U. S team our check out our website, we have some great information on our damaged duty homepage and we'll talk to you soon. Thank you.
