### ***Program Opportunity Update***

Home and Community Based Services (HCBS)  
Health Information Exchange Onboarding

The Division of Developmental Disabilities wishes to remind stakeholders of an ongoing opportunity for HCBS providers delivering services authorized by the Division to onboard to Missouri's Health Information Exchange.

In response to significant interest from the HCBS provider community, the Division has increased the size of the program to accommodate more participants. However, participation remains limited, so don't delay.

Onboarding to the Health Information Exchange provides opportunities to improve decision making, inform the development of Individual Support Plans, and stay up-to-date on changes to an individual's medical record.

For more information on eligibility and how to participate, please see the [program flyer](#) and visit the [Health Information Exchange](#) webpage.
