

WEBVTT

1 "Lisa Nothaus" (3849840896)

00:00:00.000 --> 00:00:09.059

Thank you for joining us for the 1st, Missouri division of DD and new webinar for 2023. so glad that you guys are here.

2 "Lisa Nothaus" (3849840896)

00:00:09.059 --> 00:00:23.670

The webinars are geared to we're providing an overview of information in a quick 30 minute, lunch and style lunch and learns style format. Um, we don't have a lot of time to go into great debt, but we do want to make sure that we're providing the basis.

3 "Lisa Nothaus" (3849840896)

00:00:23.670 --> 00:00:37.890

We will post this information, like it said, on the divisions webinar page. So we ask that you please share these Webinars and the information with the individuals and families that you support that. They do have the information.

4 "Lisa Nothaus" (3849840896)

00:00:37.890 --> 00:00:47.370

And again, if they can't participate live, we can always go back and direct them to the webinar page where they can review the information when it's convenient for them.

5 "Lisa Nothaus" (3849840896)

00:00:48.720 --> 00:00:52.590

Um, for today's webinar, Leslie, I'll have you flip the slide for me?

6 "Lisa Nothaus" (3849840896)

00:00:52.590 --> 00:01:01.860

We're going to start off with introductions. We'll talk about what those health risks are that make up the fatal 5+1.

7 "Lisa Nothaus" (3849840896)

00:01:01.860 --> 00:01:10.440

We're going to talk about the health risk screening tool that's being implemented through the division of DD and will help identify when those risks are present.

8 "Lisa Nothaus" (3849840896)

00:01:10.440 --> 00:01:14.160

And we're going to share a couple of resources with you before we leave.

9 "Lisa Nothaus" (3849840896)

00:01:15.300 --> 00:01:19.740

So next slide, I'll, we'll go ahead and get us started and then I'll hand it over to Leslie.

10 "Lisa Nothaus" (3849840896)

00:01:19.740 --> 00:01:28.140

I am Lisa, not house. I live in Missouri with my family, and I work for the division of dB as the supporting family's lead.

11 "Lisa Nothaus" (3849840896)

00:01:28.140 --> 00:01:38.910

My husband, I have 2 adult daughters, and our youngest daughter has a developmental disability, and she receives services through the division, the regional office, and our local SB, 40 board.

12 "Lisa Nothaus" (3849840896)

00:01:38.910 --> 00:01:44.970

I've been involved with the systems for over 30 years, and I have worked with a division.

13 "Lisa Nothaus" (3849840896)

00:01:44.970 --> 00:01:50.430

For the past 17 years so when they say time flies, it really does.

14 "Lisa Nothaus" (3849840896)

00:01:50.430 --> 00:02:02.880

Real quickly. I know we're on a time crunch today. I think some of us have to jump off of this call and get on another 1. so, Leslie, I'm going to turn it over to you and let you introduce yourself and start sharing the information.

15 "Leslie DeGroat" (3713938432)

00:02:03.565 --> 00:02:18.415

wonderful thank you so much lisa for having me it's great to be here with you all today at this lunch and learn my name is lesley to grow and i'm a registered nurse and i have thirty years of experience in the healthcare field and i'm proud to say that i have been with the division of

16 "Leslie DeGroat" (3713938432)

00:02:18.415 --> 00:02:32.665

dd as of january first for fifteen years so super proud of that and i currently get to serve as the divisions clinical coordinator and just it's a wonderful to have an opportunity like this to

17 "Leslie DeGroat" (3713938432)

00:02:32.880 --> 00:02:42.595

Here what's going on and how my team and myself, and the divisions trying to help support people with any kind of health risks and to help people, you know,

18 "Leslie DeGroat" (3713938432)

00:02:42.595 --> 00:02:50.245

just support them to say it's healthy and just have the optimal lives that they can as Lisa said.

19 "Leslie DeGroat" (3713938432)

00:02:50.245 --> 00:03:02.695

I'm going to give you an overview of the fatal 5 fundamentals as well as talk about how the health risk screening tool assist with identifying those health risks and we'll look at some tools and resources also as.

20 "Leslie DeGroat" (3713938432)  
00:03:02.880 --> 00:03:05.370  
Said so I'm really excited to be here.

21 "Leslie DeGroat" (3713938432)  
00:03:08.305 --> 00:03:22.615  
um the fatal five or the top disorders linked to preventable deaths  
intellectual developmental disabilities population or population there is  
another one that has actually been added so there are actually six

22 "Leslie DeGroat" (3713938432)  
00:03:22.615 --> 00:03:37.615  
altogether i believe they even started off with four years ago but  
they've seen more and more people have these different issues so they  
just keep adding to it the top disorders that are considered the fatal  
five plus one our aspiration

23 "Leslie DeGroat" (3713938432)  
00:03:37.620 --> 00:03:47.910  
Val, obstruction, dehydration, Gerd or stomach reflux, or people might  
call it acid reflux seizures and sepsis.

24 "Leslie DeGroat" (3713938432)  
00:03:48.565 --> 00:04:02.185  
These top disorders were identified by Karen green Magellan, who is an  
RN, and has dedicated her life to supporting people with she developed  
teaching around these health disorders, and also founded the company  
intellect abilities.

25 "Leslie DeGroat" (3713938432)  
00:04:03.085 --> 00:04:17.635  
Electability. That's the company that we're working with, on our health  
risk screening tool, or Hearst that the division is going to be using for  
everyone in order to figure out a person, the person's health risks and  
see what kind of supports they would like to have to.

26 "Leslie DeGroat" (3713938432)  
00:04:17.910 --> 00:04:23.935  
And stay healthy in our philosophy, is that knowledge is power.

27 "Leslie DeGroat" (3713938432)  
00:04:23.935 --> 00:04:33.235  
And if you can identify certain health risks, early on, you can have  
supports in place already to help you or people you support from getting  
very sick,

28 "Leslie DeGroat" (3713938432)  
00:04:33.415 --> 00:04:46.465  
or at least identifying a problem early on and getting the person help  
that they need before before it gets worse or, you know, ends up in the  
hospital or even even, you know, some people can pass away from these  
things.

29 "Leslie DeGroat" (3713938432)  
00:04:49.434 --> 00:04:53.814  
So, aspiration, it's also called pulmonary aspiration.

30 "Leslie DeGroat" (3713938432)  
00:04:54.114 --> 00:04:55.524  
That's the 1st,

31 "Leslie DeGroat" (3713938432)  
00:04:55.524 --> 00:05:10.224  
1 listed for the fatal 5 and that's when food liquid saliva vomit or some other foreign substance gets breathed into the airways other terms that are associated with pulmonary aspiration

32 "Leslie DeGroat" (3713938432)  
00:05:10.584 --> 00:05:16.644  
or aspiration pneumonia, which is an inflammation and infection of the lungs and that's caused by a.

33 "Leslie DeGroat" (3713938432)  
00:05:16.979 --> 00:05:27.149  
Mary aspiration, so they breathe in a foreign substance, and it can cause a person to develop an infection and swelling in their lungs and just get really sick.

34 "Leslie DeGroat" (3713938432)  
00:05:28.224 --> 00:05:37.404  
dysphasia, that's another term associated with aspiration and that means that people have problems with chewing or swallowing due to the muscles.

35 "Leslie DeGroat" (3713938432)  
00:05:37.404 --> 00:05:46.254  
Maybe not working properly in their mouth, or in their throat and when that's not working properly, then stuff it goes down into their lungs easier.

36 "Leslie DeGroat" (3713938432)  
00:05:47.184 --> 00:06:01.614  
And then choking, of course, you've heard of and some people have a more of a proclivity for choking when they have swallowing issues and that's defined as a complete blocking of the airway. So, no air can pass through and breathing. Sometimes.

37 "Leslie DeGroat" (3713938432)  
00:06:01.614 --> 00:06:15.954  
If a person chokes also, they can develop aspiration pneumonia if anything got down into the lungs. So it's important for that person to be monitored for any breathing trouble or symptoms of coming down with a bad cold or respiratory infection.

38 "Leslie DeGroat" (3713938432)  
00:06:16.679 --> 00:06:31.284  
some people you may not know this but some people aspirate silently so they could be eating and perhaps a little bit of food goes in their lungs

and they don't even cough or have a gag reflex so you wouldn't even know or perhaps even they're

39 "Leslie DeGroat" (3713938432)

00:06:31.284 --> 00:06:38.004

saliva they're not able to effectively swallow their saliva so then it goes down into their lungs um

40 "Leslie DeGroat" (3713938432)

00:06:38.369 --> 00:06:52.049

And really, sometimes the only way to tell that is, if they start having trouble breathing, or you notice that they're developing a note, they've developed pneumonia, or even cold symptoms.

41 "Leslie DeGroat" (3713938432)

00:06:53.454 --> 00:07:08.154

Now, Bell obstruction, that's the 2nd of the fatal 5+1 health conditions that we'll talk about and that's a blockage that keeps food or liquid from passing through your intestines. It leads to death, if not recognized and treated on time.

42 "Leslie DeGroat" (3713938432)

00:07:08.154 --> 00:07:21.834

1, common cause of Bell obstruction in the population is impacted feces or, you know, their bowel movement or stool. It just doesn't go out. They get really constipated. A lot of. lot of

43 "Leslie DeGroat" (3713938432)

00:07:22.049 --> 00:07:34.104

Both suffer with constipation or on many meds, and it's just so important to help keep their bowels moving so that that doesn't occur. So that puts people at a higher risk.

44 "Leslie DeGroat" (3713938432)

00:07:34.464 --> 00:07:49.014

And then constipation you guys I'm sure already know it. But how they define it, how it's defined medically, it's infrequent bowel movements or bowel movements that are dryer, hard and consistency or small 1 size and the neck.

45 "Leslie DeGroat" (3713938432)

00:07:49.014 --> 00:07:51.984

And that leads to painful and difficult passage of stool.

46 "Leslie DeGroat" (3713938432)

00:07:52.049 --> 00:08:02.339

So, even if a person does have a bowel movement, if it's not very much, it's very hard to get out or difficult. That is considered constipation and they may want to be looked at.

47 "Leslie DeGroat" (3713938432)

00:08:05.394 --> 00:08:17.814

Dehydration that's defined as a harmful reduction in the amount of water in the body. Dehydration is a common problem experienced by people with intellectual and developmental disabilities.

48 "Leslie DeGroat" (3713938432)

00:08:18.114 --> 00:08:31.974

A person may not be able to tell someone with words that they are thirsty or be able to get up and get a drink by themselves. Dehydration can range from mild to severe and contributes to other health problems such as.

49 "Leslie DeGroat" (3713938432)

00:08:32.339 --> 00:08:38.244

Patient toxicity, kidney problems and seizures and constipation too.

50 "Leslie DeGroat" (3713938432)

00:08:38.274 --> 00:08:52.824

If you drink and plenty of fluids is 1 of the things we encourage people to do, if they are constipated, or have that problem, this dehydration believe it or not is a condition that can easily be overlooked. And it can be life threatening.

51 "Leslie DeGroat" (3713938432)

00:08:56.604 --> 00:09:04.824

The next 1 on our list is gastro esophageal reflux disease and I don't expect anyone to say that 5 times fast.

52 "Leslie DeGroat" (3713938432)

00:09:04.884 --> 00:09:19.074

I like to just say, Gerd or sometimes people call it gastric reflux, acid, indigestion or chronic heartburn. It is a digestive disorder. That affects the ring of muscle between the esophagus and stomach.

53 "Leslie DeGroat" (3713938432)

00:09:19.074 --> 00:09:23.814

So it's like a little gate between this esophagus stomach and sometimes people.

54 "Leslie DeGroat" (3713938432)

00:09:24.174 --> 00:09:35.814

If they're born with it, not working properly or different things can affect it to where it just doesn't work properly and whatever is in the stomach will flow back into the esophagus.

55 "Leslie DeGroat" (3713938432)

00:09:35.814 --> 00:09:40.073

And that could be food fluid or stomach acid.

56 "Leslie DeGroat" (3713938432)

00:09:41.214 --> 00:09:56.124

And that can be very uncomfortable and what could occur is the stomach contents that flow up, you know, what if they're not if they're laying flat, they can go right back down into their lungs and cause problems that way some people have,

57 "Leslie DeGroat" (3713938432)

00:09:56.124 --> 00:10:10.254

what is called a hiatal hernia and that's a condition in which the upper part of your stomach bulges through an opening in that muscle you have a muscle under your right in between the base of your lungs and that keeps helps.

58 "Leslie DeGroat" (3713938432)

00:10:10.499 --> 00:10:21.629

Acid for coming up in your esophagus as well. So that can also cause that acid reflux or gird and there's many people that have it and may not even know it.

59 "Leslie DeGroat" (3713938432)

00:10:25.794 --> 00:10:36.684

Seizures is another of the fatal 5+1 seizures are a sudden surge of electrical activity in the brain. It usually affects how a person appears or acts for a short time.

60 "Leslie DeGroat" (3713938432)

00:10:36.684 --> 00:10:43.074

But also whatever the brain and body can do normally can also occur during a seizure. a seizure

61 "Leslie DeGroat" (3713938432)

00:10:43.649 --> 00:10:47.309

That's a very serious 1 if not controlled.

62 "Leslie DeGroat" (3713938432)

00:10:50.694 --> 00:10:59.664

Sepsis, the body, let's see, another of the fatal 5 is sepsis, and that is the body's extreme response to an infection.

63 "Leslie DeGroat" (3713938432)

00:10:59.934 --> 00:11:14.544

It is life threatening and without timely treatment sepsis can rapidly lead to tissue damage organ failure in depth. Sepsis occurs when an existing infection. So a person already has an infection may be in their skin.

64 "Leslie DeGroat" (3713938432)

00:11:14.814 --> 00:11:18.564

Maybe they've had pneumonia. Maybe they've had a urinary tract.

65 "Leslie DeGroat" (3713938432)

00:11:18.629 --> 00:11:22.559

Infection or sometimes people call that a bladder kidney infection.

66 "Leslie DeGroat" (3713938432)

00:11:23.094 --> 00:11:36.864

That can trigger as chain reaction throughout your the person's body. And septic shock is is a progression of that. Sepsis and that severe reaction. It leads to dangerously low blood pressure.

67 "Leslie DeGroat" (3713938432)

00:11:37.164 --> 00:11:48.294

And then, like, the organs of your body, they don't receive sufficient oxygen. So the body starts shutting down and that's people usually have to be an intensive care unit when they're that sick.

68 "Leslie DeGroat" (3713938432)

00:11:48.599 --> 00:11:51.629

It's definitely a life threatening emergency.

69 "Leslie DeGroat" (3713938432)

00:11:53.664 --> 00:12:04.764

So, how can, how can the Missouri developmental disabilities, health risk, screening tool or Hurst? You might have heard it called Hearst how can that help?

70 "Leslie DeGroat" (3713938432)

00:12:05.154 --> 00:12:19.674

Well, the hostess is with identifying risk factors that can lead to the fail 5+1 conditions, the health risk screening tool or Hurst offers 1 of the leading screening tools for intellectual disability, risk management and support.

71 "Leslie DeGroat" (3713938432)

00:12:19.674 --> 00:12:20.574

and support

72 "Leslie DeGroat" (3713938432)

00:12:21.119 --> 00:12:35.934

This health risk assessment tool is a web based rating instrument so you log into the computer to do it and it's developed to detect help destabilization in at risk populations and ensure that proper care and support is provided.

73 "Leslie DeGroat" (3713938432)

00:12:38.249 --> 00:12:49.584

It monitors this, this screening tool, assists us with monitoring for associated, developmental and physical disabilities, which specifically affect body systems,

74 "Leslie DeGroat" (3713938432)

00:12:49.944 --> 00:13:01.074

and the person's ability to engage and functional activities for just a regular routine of their day. Um, this allows their team to make real time care decisions.

75 "Leslie DeGroat" (3713938432)

00:13:01.074 --> 00:13:08.244

That other health screening tools may not support and I'll show you the website here in a little bit. The electability.

76 "Leslie DeGroat" (3713938432)

00:13:08.249 --> 00:13:22.764

company and their tool if you would like to look at that further i'll pull that up and we can we can leave you with that information see all missouri users oh i want you guys to know this to all missouri users who get access to the her system

77 "Leslie DeGroat" (3713938432)

00:13:23.094 --> 00:13:37.944

will be required to take a special training in that system and it's on the fatal five plus one and it teaches about symptoms risk factors and what to report to the medical provider we really want people to learn about this so that we can help identify

78 "Leslie DeGroat" (3713938432)

00:13:37.944 --> 00:13:38.154

these

79 "Leslie DeGroat" (3713938432)

00:13:38.249 --> 00:13:53.214

Problems fast and help put supports in place, or if someone's coming coming down with 1 of these you recognize something's not right? You get him to the hospital or to the doctor as soon as you can so that we can prevent them from getting sicker cause.

80 "Leslie DeGroat" (3713938432)

00:13:53.214 --> 00:14:05.994

They can't be fatal. That's why I mean, that's why they're called the fatal 5, but that's my goal. That's the divisions. Goal is to help people decrease that risk and help people live healthier and happier and longer.

81 "Leslie DeGroat" (3713938432)

00:14:09.264 --> 00:14:24.174

so another thing i want to talk about on this slide health risk support plans are created based on the areas where there is higher risk currently twenty six days in the united states are using the health risk screening tool and eighty thousand people with

82 "Leslie DeGroat" (3713938432)

00:14:24.204 --> 00:14:36.324

id'd are being monitored using this tool so the missouri division of developmental disabilities is using this tool to screen people who have a d h d waiver and right now contract is

83 "Leslie DeGroat" (3713938432)

00:14:36.329 --> 00:14:51.144

Service provider agencies who provide residential services or support coordination go can go ahead and start screening people on May 1st of 2023. everyone with a waiver will be start to be screened.

84 "Leslie DeGroat" (3713938432)

00:14:51.714 --> 00:15:03.564

And that's just a way for us to ensure that we do have a Medicaid sub assurance that we are bound to, of ensuring participant health and welfare. participant health and welfare

85 "Leslie DeGroat" (3713938432)  
00:15:05.129 --> 00:15:09.809  
We're obligated to to assure that.

86 "Leslie DeGroat" (3713938432)  
00:15:11.784 --> 00:15:26.244  
Now, I'm going to talk about the screen itself. Um, and also at the end of this, I'll leave that. I'll show you the website that talks about it, and also an email address. If you have questions, please, please reach out to that email box.

87 "Leslie DeGroat" (3713938432)  
00:15:26.574 --> 00:15:35.724  
And besides during our meeting today, but please afterward, you're more than welcome to send an email and me and my team will answer that and get you information on this.

88 "Leslie DeGroat" (3713938432)  
00:15:36.179 --> 00:15:51.114  
So this slide here shows, it's a listing of the standardized categories rating items for the health risk screening tool, or Hearst, the rating items were identified as areas where health risk,

89 "Leslie DeGroat" (3713938432)  
00:15:51.114 --> 00:16:06.084  
and destabilization are likely to occur, especially in the and vulnerable populations the score from each item. Indicates a degree of risk and provides an individualized snapshot of the heightened risk for the person. So.

90 "Leslie DeGroat" (3713938432)  
00:16:06.744 --> 00:16:20.184  
Any planning and support planning and action strategies can be implemented, but it is a team effort. I want to say a person will be assisting with the rating, but that individual and their caregiver, their family, whomever knows them.

91 "Leslie DeGroat" (3713938432)  
00:16:20.184 --> 00:16:23.004  
Well, as important to them will be involved in this.

92 "Leslie DeGroat" (3713938432)  
00:16:23.339 --> 00:16:33.839  
Under functional status, you see that 1st 1, right? There things like eating walking and toileting are reviewed for support needs.

93 "Leslie DeGroat" (3713938432)  
00:16:33.839 --> 00:16:44.279  
Under behaviors, things like self abuse aggression, or any behavior supports, including medications are reviewed for support needs.

94 "Leslie DeGroat" (3713938432)  
00:16:45.294 --> 00:16:53.934

Under the physiological category that has to do with your digestive system and that includes swallowing your stomach your intestines.

95 "Leslie DeGroat" (3713938432)

00:16:54.234 --> 00:17:08.844

It also includes seizures and nutrition, and then any treatments that a person may have, that does pose some risk to them, like a self capitalization or your self urinary catheterization does have risk for infection.

96 "Leslie DeGroat" (3713938432)

00:17:08.844 --> 00:17:14.034

So that's considered kind of a high risk treatment there. The.

97 "Leslie DeGroat" (3713938432)

00:17:14.279 --> 00:17:16.829

Category is safety.

98 "Leslie DeGroat" (3713938432)

00:17:16.829 --> 00:17:20.069

And that has to do with injury and falls.

99 "Leslie DeGroat" (3713938432)

00:17:22.319 --> 00:17:26.429

And then the 3rd category has to do with a person, has to have.

100 "Leslie DeGroat" (3713938432)

00:17:26.429 --> 00:17:40.019

I guess they see medical specialists if they have follow up from hospitalizations and emergency room visits or even if they do go to the hospital or emergency room, that that's considered a heightened risk.

101 "Leslie DeGroat" (3713938432)

00:17:41.634 --> 00:17:55.824

Some people may not even have a lot of risk in these areas and that's okay. It will provide a baseline for how the person is doing. So, that if they maybe in the future, that person might need other supports. It can be demonstrated by this tool.

102 "Leslie DeGroat" (3713938432)

00:17:56.033 --> 00:18:00.594

And how their support needs have changed and also help identify those needs.

103 "Leslie DeGroat" (3713938432)

00:18:04.404 --> 00:18:09.954

After the screen is complete, the system will assign a level of risk for the person screened level.

104 "Leslie DeGroat" (3713938432)

00:18:09.954 --> 00:18:21.654

1, and 2, as you can see on this slide, or people who don't have much risk or low risk level 3 and 4, they're people with moderate or high moderate risk. These are people.

105 "Leslie DeGroat" (3713938432)

00:18:23.664 --> 00:18:32.184

Who who may have underlying health or behavioral conditions that you don't maybe really notice that they can they can definitely cause that person to destabilize.

106 "Leslie DeGroat" (3713938432)

00:18:32.424 --> 00:18:47.214

Especially if they come down with it, like another illness, or they get injured accidentally, maybe certain things not monitored by the doctor. Like blood work for a chronic condition might be brought out there to where it brings a person. The team's attention to that.

107 "Leslie DeGroat" (3713938432)

00:18:48.354 --> 00:18:51.834

Level 5, and level 6 are high and highest risk.

108 "Leslie DeGroat" (3713938432)

00:18:51.864 --> 00:19:06.114

Those are people that probably already have noted health or behavioral supports, but the screen can help identify, perhaps other support needs that can help the person overall and stabilize and help them stabilized or stay stable.

109 "Leslie DeGroat" (3713938432)

00:19:06.114 --> 00:19:17.484

It just depends on their situation because we do it is individualized per person. It's not cookie cutter. Everyone is an individual and that's that's our goal too is to respect people's.

110 "Leslie DeGroat" (3713938432)

00:19:17.639 --> 00:19:26.999

Individuality and personal what what is what's good for them and for, you know, it's good for them. Not not just put them in a box.

111 "Leslie DeGroat" (3713938432)

00:19:28.974 --> 00:19:43.734

there are other key elements of the hearst or healthcare screening tool that i'd like to also bring up and that is as i kind of mentioned a minute ago it establishes a health baseline and it allows the person's health status to be monitored it also

112 "Leslie DeGroat" (3713938432)

00:19:43.734 --> 00:19:58.014

assists with transition planning and continuity of care should the person support needs change over time it also shows the person's support team which includes the person the individual themselves the caregiver

113 "Leslie DeGroat" (3713938432)

00:19:58.049 --> 00:20:08.759

Her family, whomever is important to them and their support team. It shows what health related support needs that person might have that like I said, it's individual to that person.

114 "Leslie DeGroat" (3713938432)  
00:20:08.759 --> 00:20:22.734

And just because something's recommended in the, the health risk screening tool, and the support's brought up, it is just it's tailored to that person and it also enhances the individual service plan development or the ISP.

115 "Leslie DeGroat" (3713938432)  
00:20:23.484 --> 00:20:23.964  
Um.

116 "Leslie DeGroat" (3713938432)  
00:20:25.044 --> 00:20:39.234

There are many goals for this, which is to keep people healthy help. Hopefully keep them out of the hospital decrease premature death and just help people to live in their preferred setting and get the supports that they need to be able to live. Just live their best lives.

117 "Leslie DeGroat" (3713938432)  
00:20:41.189 --> 00:20:45.029  
And I have information.

118 "Leslie DeGroat" (3713938432)  
00:20:46.349 --> 00:20:46.829  
Yes,

119 "Leslie DeGroat" (3713938432)  
00:20:47.064 --> 00:21:01.524

I can hear his information right here on this screen and I can take you actually to the page and actually kind of talk to you about what to expect for actually I'll go ahead and talk about what to expect right now

120 "Leslie DeGroat" (3713938432)  
00:21:01.554 --> 00:21:10.554

for people who have the comprehensive waiver, or they have the nurse that constant sees them monthly that nurse will um.

121 "Leslie DeGroat" (3713938432)  
00:21:11.364 --> 00:21:14.963

Meet with the individual and a direct support professional that knows them.

122 "Leslie DeGroat" (3713938432)  
00:21:14.963 --> 00:21:25.164

Well, and again, it could be a family member as well or whomever is important to that person and during their ISP or their individual support plan planning month,

123 "Leslie DeGroat" (3713938432)  
00:21:25.194 --> 00:21:38.154

they will sit down together and the nurse will ask questions about how they and different things like that. And then they completed, it's the questions have, I don't want to say ideology.

124 "Leslie DeGroat" (3713938432)  
00:21:38.814 --> 00:21:40.614  
Can't think of the right word, but it's built.

125 "Leslie DeGroat" (3713938432)  
00:21:41.124 --> 00:21:55.974  
like some kind of intelligence built into it to where it populates a question based on how the previous ones answered and that's how it comes up with a score so that's what that will look like people who have non residential waiver services your support

126 "Leslie DeGroat" (3713938432)  
00:21:55.974 --> 00:22:10.824  
coordinator will reach out to you and schedule a time to where they can be the one that answers the questions but definitely with the input of a caregiver and the individual supported and and just whomever else if you want someone else in there to help

127 "Leslie DeGroat" (3713938432)  
00:22:10.949 --> 00:22:12.839  
Help me answer the questions.

128 "Leslie DeGroat" (3713938432)  
00:22:12.839 --> 00:22:17.729  
And I can show you, I have.

129 "Leslie DeGroat" (3713938432)  
00:22:17.729 --> 00:22:21.659  
Let me stop sharing just for a 2nd, or maybe.

130 "Leslie DeGroat" (3713938432)  
00:22:21.659 --> 00:22:25.139  
I'm trying to figure this out here, I'll push escape.

131 "Leslie DeGroat" (3713938432)  
00:22:25.139 --> 00:22:29.549  
Mm, hmm.

132 "Leslie DeGroat" (3713938432)  
00:22:31.559 --> 00:22:42.089  
Hang on just a 2nd I apologize. I'm trying if I had it pulled up on a different screen.

133 "Leslie DeGroat" (3713938432)  
00:22:42.089 --> 00:22:48.299  
Um, might be right here. Okay. Here we go. Um.

134 "Leslie DeGroat" (3713938432)  
00:22:48.299 --> 00:22:59.609  
Oh, I wanted to point this out to you on the health and safety page and on our from our division web page, there are.

135 "Leslie DeGroat" (3713938432)

00:22:59.609 --> 00:23:13.674

different observe decide act is what they're called in their informational sheets and there's one on aspiration ammonia there's one on each of the fatal five plus one and it tells you more in depth how

136 "Leslie DeGroat" (3713938432)

00:23:14.814 --> 00:23:28.374

like a signs and symptoms of each one like what to watch out for and then it also talks about actions you can take as far as things you might bring up to your primary care provider or doctor things of that nature

137 "Leslie DeGroat" (3713938432)

00:23:29.124 --> 00:23:37.374

And it talks about risk factors as well and there's also like stuff about winter weather and, and just different other ones, but we do have a fatal 5+1 here.

138 "Leslie DeGroat" (3713938432)

00:23:37.374 --> 00:23:51.534

I wanted to point that out to ya and then our Missouri health risk screening tool page is right here here, there's an overview document that talks about the process. You just click that link.

139 "Leslie DeGroat" (3713938432)

00:23:51.534 --> 00:23:52.944

that link

140 "Leslie DeGroat" (3713938432)

00:23:53.549 --> 00:24:00.779

We have frequently asked questions that we've gathered from other webinars that we've had and answer them there.

141 "Leslie DeGroat" (3713938432)

00:24:00.779 --> 00:24:06.119

This tab right here is information for individuals and families.

142 "Leslie DeGroat" (3713938432)

00:24:07.349 --> 00:24:13.469

And there are 2 short videos, and they talk about the health risks screening tool.

143 "Leslie DeGroat" (3713938432)

00:24:13.469 --> 00:24:21.719

So those might be beneficial to watch as well as to get an idea of what what that looks like.

144 "Leslie DeGroat" (3713938432)

00:24:22.014 --> 00:24:36.684

here we have for the different service providers who on board different they can go here so provider agency can go here and watch a recorded webinar i know how to get started because like i said right now it's voluntary to go ahead and start

145 "Leslie DeGroat" (3713938432)

00:24:36.684 --> 00:24:51.624

screening people but starting may people will start being screened when it comes to their isp planning month and as as you guys may remember i had mentioned the health risk support plans if a person scores higher

146 "Leslie DeGroat" (3713938432)

00:24:51.719 --> 00:25:05.279

Certain risk areas either the nurse if they're residential, we'll meet again with that individual, that direct support professional that knows them. Well, and then whomever that the individual wants to be present.

147 "Leslie DeGroat" (3713938432)

00:25:05.784 --> 00:25:16.464

And they'll talk about different support options that they can enact for that person to help, keep them healthy and just kind of talk about it as a team and see what works best for that person.

148 "Leslie DeGroat" (3713938432)

00:25:16.824 --> 00:25:31.734

And it's the same thing for support coordinators with non residential waiver. Participants, they'll, they'll, they'll after the screening tool is submitted, they'll meet with the individual caregiver or family.

149 "Leslie DeGroat" (3713938432)

00:25:31.734 --> 00:25:35.274

Whomever is important to that individual and talk about different.

150 "Leslie DeGroat" (3713938432)

00:25:35.279 --> 00:25:47.994

Support options that that person could have and put it in their plan and it's just to really just help bring forth knowledge on different health aspects and different supports that could be needed.

151 "Leslie DeGroat" (3713938432)

00:25:48.264 --> 00:25:52.914

It's not a, it's a, it's just it's just really to just help people out there.

152 "Leslie DeGroat" (3713938432)

00:25:53.724 --> 00:26:05.274

Like I said, live live, healthier, have those supports in place so they can live healthier and they're just their optimal best life, but it is is individualized for that. For the people out there.

153 "Leslie DeGroat" (3713938432)

00:26:05.279 --> 00:26:05.969

Here.

154 "Leslie DeGroat" (3713938432)

00:26:05.969 --> 00:26:11.459

And there was 1 more thing, hang on a 2nd here.

155 "Leslie DeGroat" (3713938432)

00:26:11.459 --> 00:26:19.289

I can get to it. Okay you want to move it? I've got a thing in my way. You guys can't see it.

156 "Leslie DeGroat" (3713938432)  
00:26:20.304 --> 00:26:33.564

Okay, there we go this is the electability. That's the company they created hers and it talks about those screening tool here. It gives a lot of information about it.

157 "Leslie DeGroat" (3713938432)  
00:26:34.254 --> 00:26:37.494

It talks about other states that are using it.

158 "Leslie DeGroat" (3713938432)  
00:26:37.889 --> 00:26:43.979

Here's also a video that you can watch that talks about it. Um.

159 "Leslie DeGroat" (3713938432)  
00:26:43.979 --> 00:26:53.489

And as I said, 26 other states are using this tool to to screen people for risk and to put supports in place.

160 "Leslie DeGroat" (3713938432)  
00:26:55.379 --> 00:27:00.089

So, this, this kind of talks a little bit about it all through here.

161 "Leslie DeGroat" (3713938432)  
00:27:00.089 --> 00:27:12.834

In this company has other things like person, center training and different things of that nature, which you may, or may not be interested in but as a division, we're definitely interested in moving forward with being more person centered,

162 "Leslie DeGroat" (3713938432)  
00:27:13.044 --> 00:27:25.554

individualizing things for people and then just making sure that we're doing the best that we can providing the best supports that we can, but you can't do that without knowledge and information. So that's that's where this comes in.

163 "Leslie DeGroat" (3713938432)  
00:27:25.859 --> 00:27:35.819

And it looks like we only have about 2 minutes until we are complete. I'm going to pull up the slides again.

164 "Leslie DeGroat" (3713938432)  
00:27:39.299 --> 00:27:42.719

Thank you for bearing with me on my, my clunkiness.

165 "Leslie DeGroat" (3713938432)  
00:27:42.719 --> 00:27:48.839

Okay, hang on. Let me get to the sorry if I'm making you guys dizzy. I apologize.

166 "Leslie DeGroat" (3713938432)

00:27:51.509 --> 00:28:01.769

okay there's that page there with the different emails and please email it project dot gov for questions and

167 "Leslie DeGroat" (3713938432)

00:28:03.689 --> 00:28:08.099

I'm not sure that we really have time for questions at this juncture.

168 "Leslie DeGroat" (3713938432)

00:28:08.099 --> 00:28:11.609

I apologize that we do welcome them in our mailbox.

169 "Lisa Nothaus" (3849840896)

00:28:13.079 --> 00:28:27.984

a lot of great information leslie thank you so much for coming on board and sharing that with us um you know you and i have talked before on different things and we've talked about the fatal five and you know i think you mentioned back in the day it used to

170 "Lisa Nothaus" (3849840896)

00:28:27.984 --> 00:28:29.214

be the fatal four and they've

171 "Lisa Nothaus" (3849840896)

00:28:29.579 --> 00:28:35.616

Added to it, as they discover these, these other health risks, and as a model, if somebody who hasn't develop.
