

Mental Health Mondays

BH/IDD Updates
Issue 43
July 10, 2023

What's new in the Behavioral Health and Intellectual Developmental Disability world?

- The Behavioral Health Systems Improvement (BHSI) group is conducting a service analysis to identify what is working well, areas for improvement, and out-of-the-box ideas to help people get their needs met regardless of their residence. This group meets every other Friday.
- Specialized Behavioral Health (BH) and Intellectual Developmental Disability (IDD) residential models are being designed with the help of current residential providers, the Department of Mental Health, and the Missouri Behavioral Health Council. These models will help people currently boarding in hospitals and needing higher-intensity care in the community.
- The Children's Office is in the process of developing a 1115c demonstration waiver. This waiver is being created to address youth boarding in emergency rooms and psychiatric hospitals, most of whom have BHIDD diagnoses.
