Supporting Families Best Practices Series

Expanding and Operationalizing Family Support

September 7, 2023

1:00 - 2:30

The National Collaborative for Supporting Families and the National Community of Practice for Supporting Families are excited to announce the kickoff of the quarterly Best Practices Series.

The Supporting Families Best Practice Series will introduce and elevate best practices related to supporting families. Each session will feature a panel of individuals or entities who will address key recommendations from the National Agenda through their lens of grassroots advocacy, “practice level” implementation, states service systems, federal policies and research.

The September Best Practice Webinar will provide an overview of the Recommendations of the National Agenda for Supporting Families. Panelists will discuss the diverse needs of families and provide perspectives on the many ways family roles can be defined and supported. They will also explore national policies that support an expanded definition of family in which all members receive the services, supports and assistance they need to pursue their version of a meaningful life.
