

DIVISION OF  
DEVELOPMENTAL  
DISABILITIES

# Safety Crisis Plans

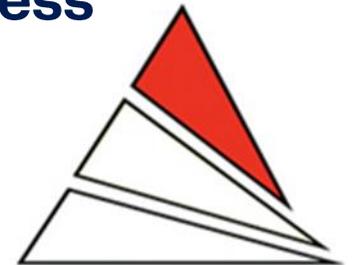

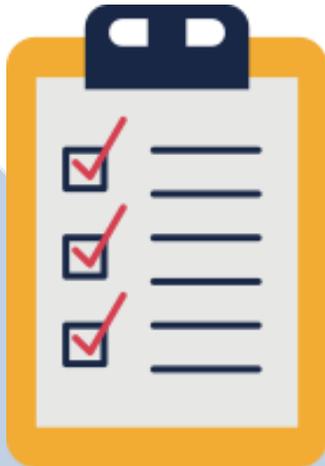

The Basics for Everyone  
Presented by the Tier 3 Team

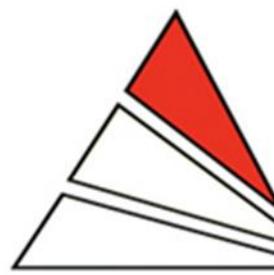

# Housekeeping

- Webinar will be posted on the DMH site under previous Webinars
  - <https://dmh.mo.gov/dev-disabilities/webinar/previous>
- Participants and those who registered will receive the PowerPoint and the recording
- Put all questions/comments in the chat box and we will acknowledge and address them throughout the presentation

# Agenda

---

## Part 1

- a. Safety Crisis Plan Overview
- b. Crisis Cycle

## Part 2

- a. Safety Crisis Plan Template
- b. Case Study

# Part I a. Safety Crisis Plan Overview

# Poll for You

## What is a Safety Crisis Plan?

- A. A plan developed only by the hospital
- B. A plan developed only by the support coordinator
- C. A plan developed by the team
- D. A plan developed only by the behavior analyst

*Type Your Response in the Chat*

# Poll for You

## What is a Safety Crisis Plan?

C. A plan developed by the team

- 9 CSR 45-3.090 requires a Safety Crisis plan be developed and implemented after first use of a reactive strategy, or when there is a likelihood reactive strategies may be used.

## About the Safety Crisis Plan

- Developed by the team when there is a history of the potential need for a reactive strategy or the actual use of a reactive strategy that is restrictive

What are some other considerations you can think of?

*Type Your Response in the Chat*

**About the Safety Crisis Plan**

- Is it used in response to an undesirable behavior?
- Is the aim to immediately change the environment, situation, or behavior?

A large orange circle is positioned on the right side of the slide. A thick orange arrow curves from the bottom left towards the circle. The text "Reactive Strategies" is centered within the circle.

Reactive  
Strategies

# Classifying Strategies

- Does it restrict movement, access to other individuals, locations, activities, or personal objects?
- Does it restrict rights?
- Is it aversive?

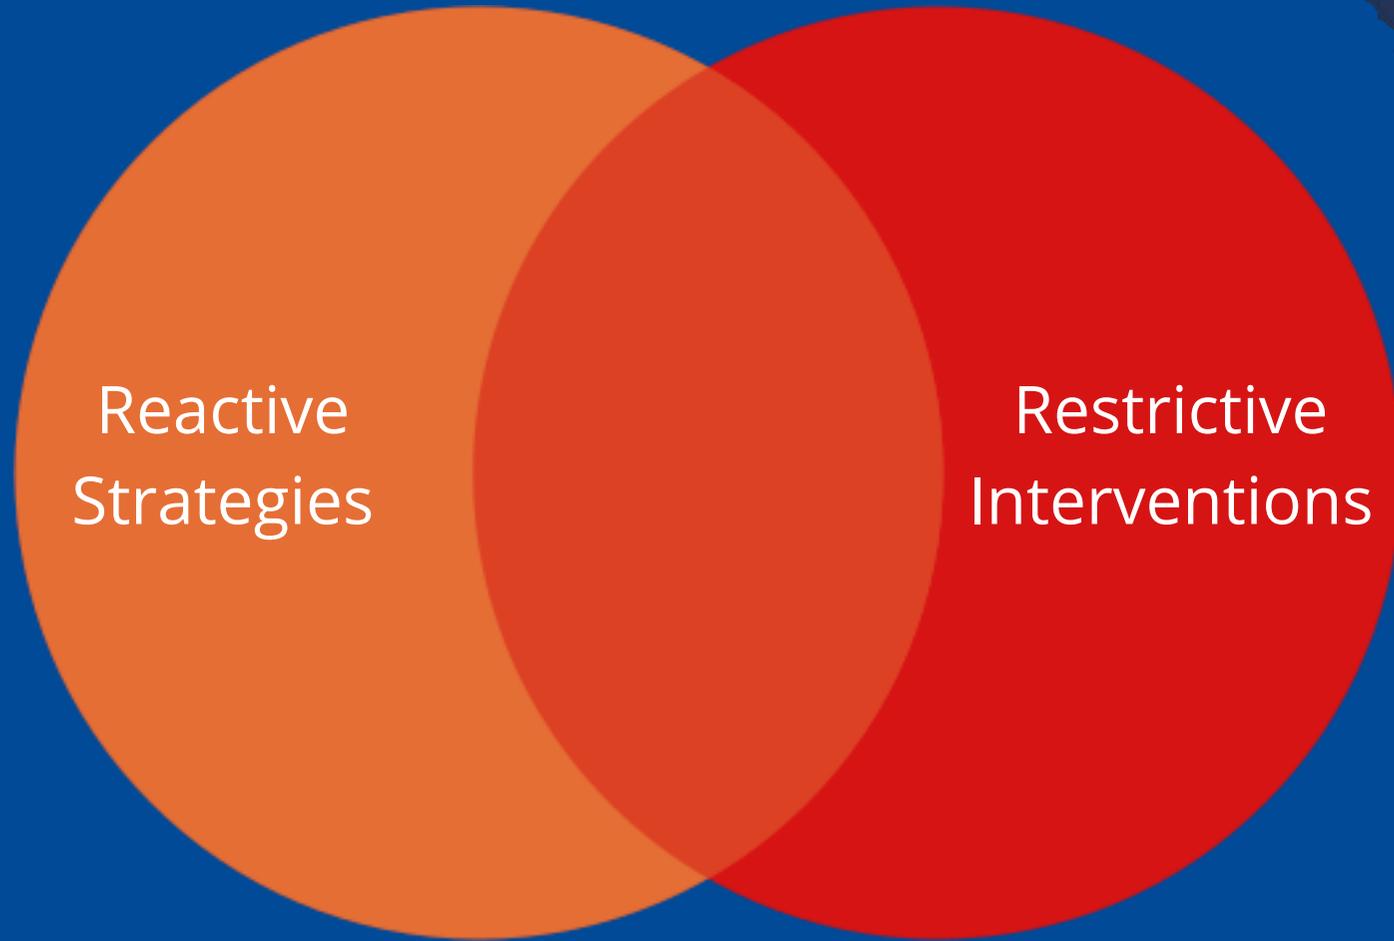

Restrictive  
Interventions

# Classifying Strategies

All restrictive interventions require that the person be afforded Due Process

# Reactive Strategies and Restrictive Interventions

# Poll for You

A reactive strategy cannot be a restrictive intervention and cannot be a rights restriction

- A. True
- B. False

*Type Your Response in the Chat*

# Poll for You

A reactive strategy cannot be a restrictive intervention and cannot be a rights restriction

B. False

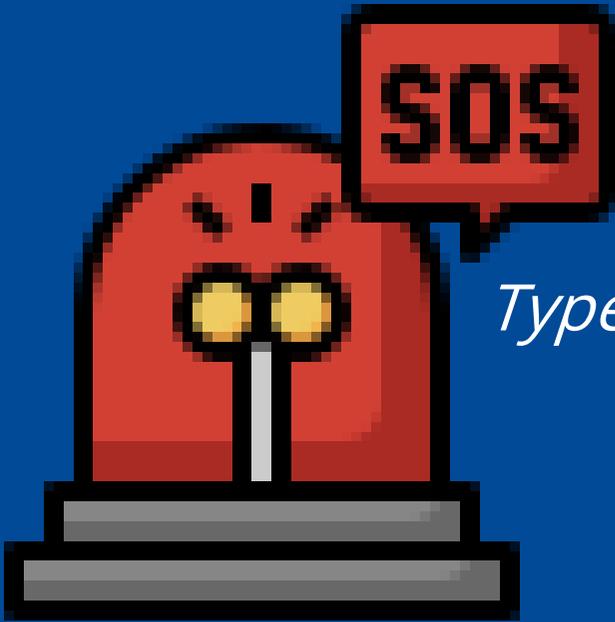

# Poll for You

Can Physical Crisis Management Procedures be used in an emergency?

- A. No
- B. Yes

# Poll for You

Which of the following would lead you to escalate?

- A. Someone cutting you off in traffic
- B. A flat tire
- C. A family member becoming sick
- D. Spilling your coffee

*Type Your Response in the Chat*

**Crisis**

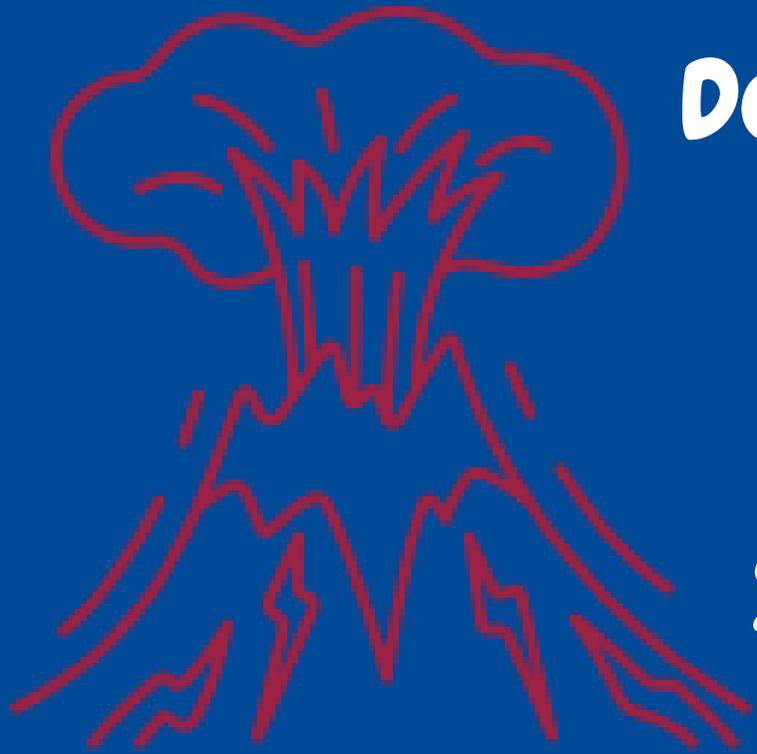

**Escalation**

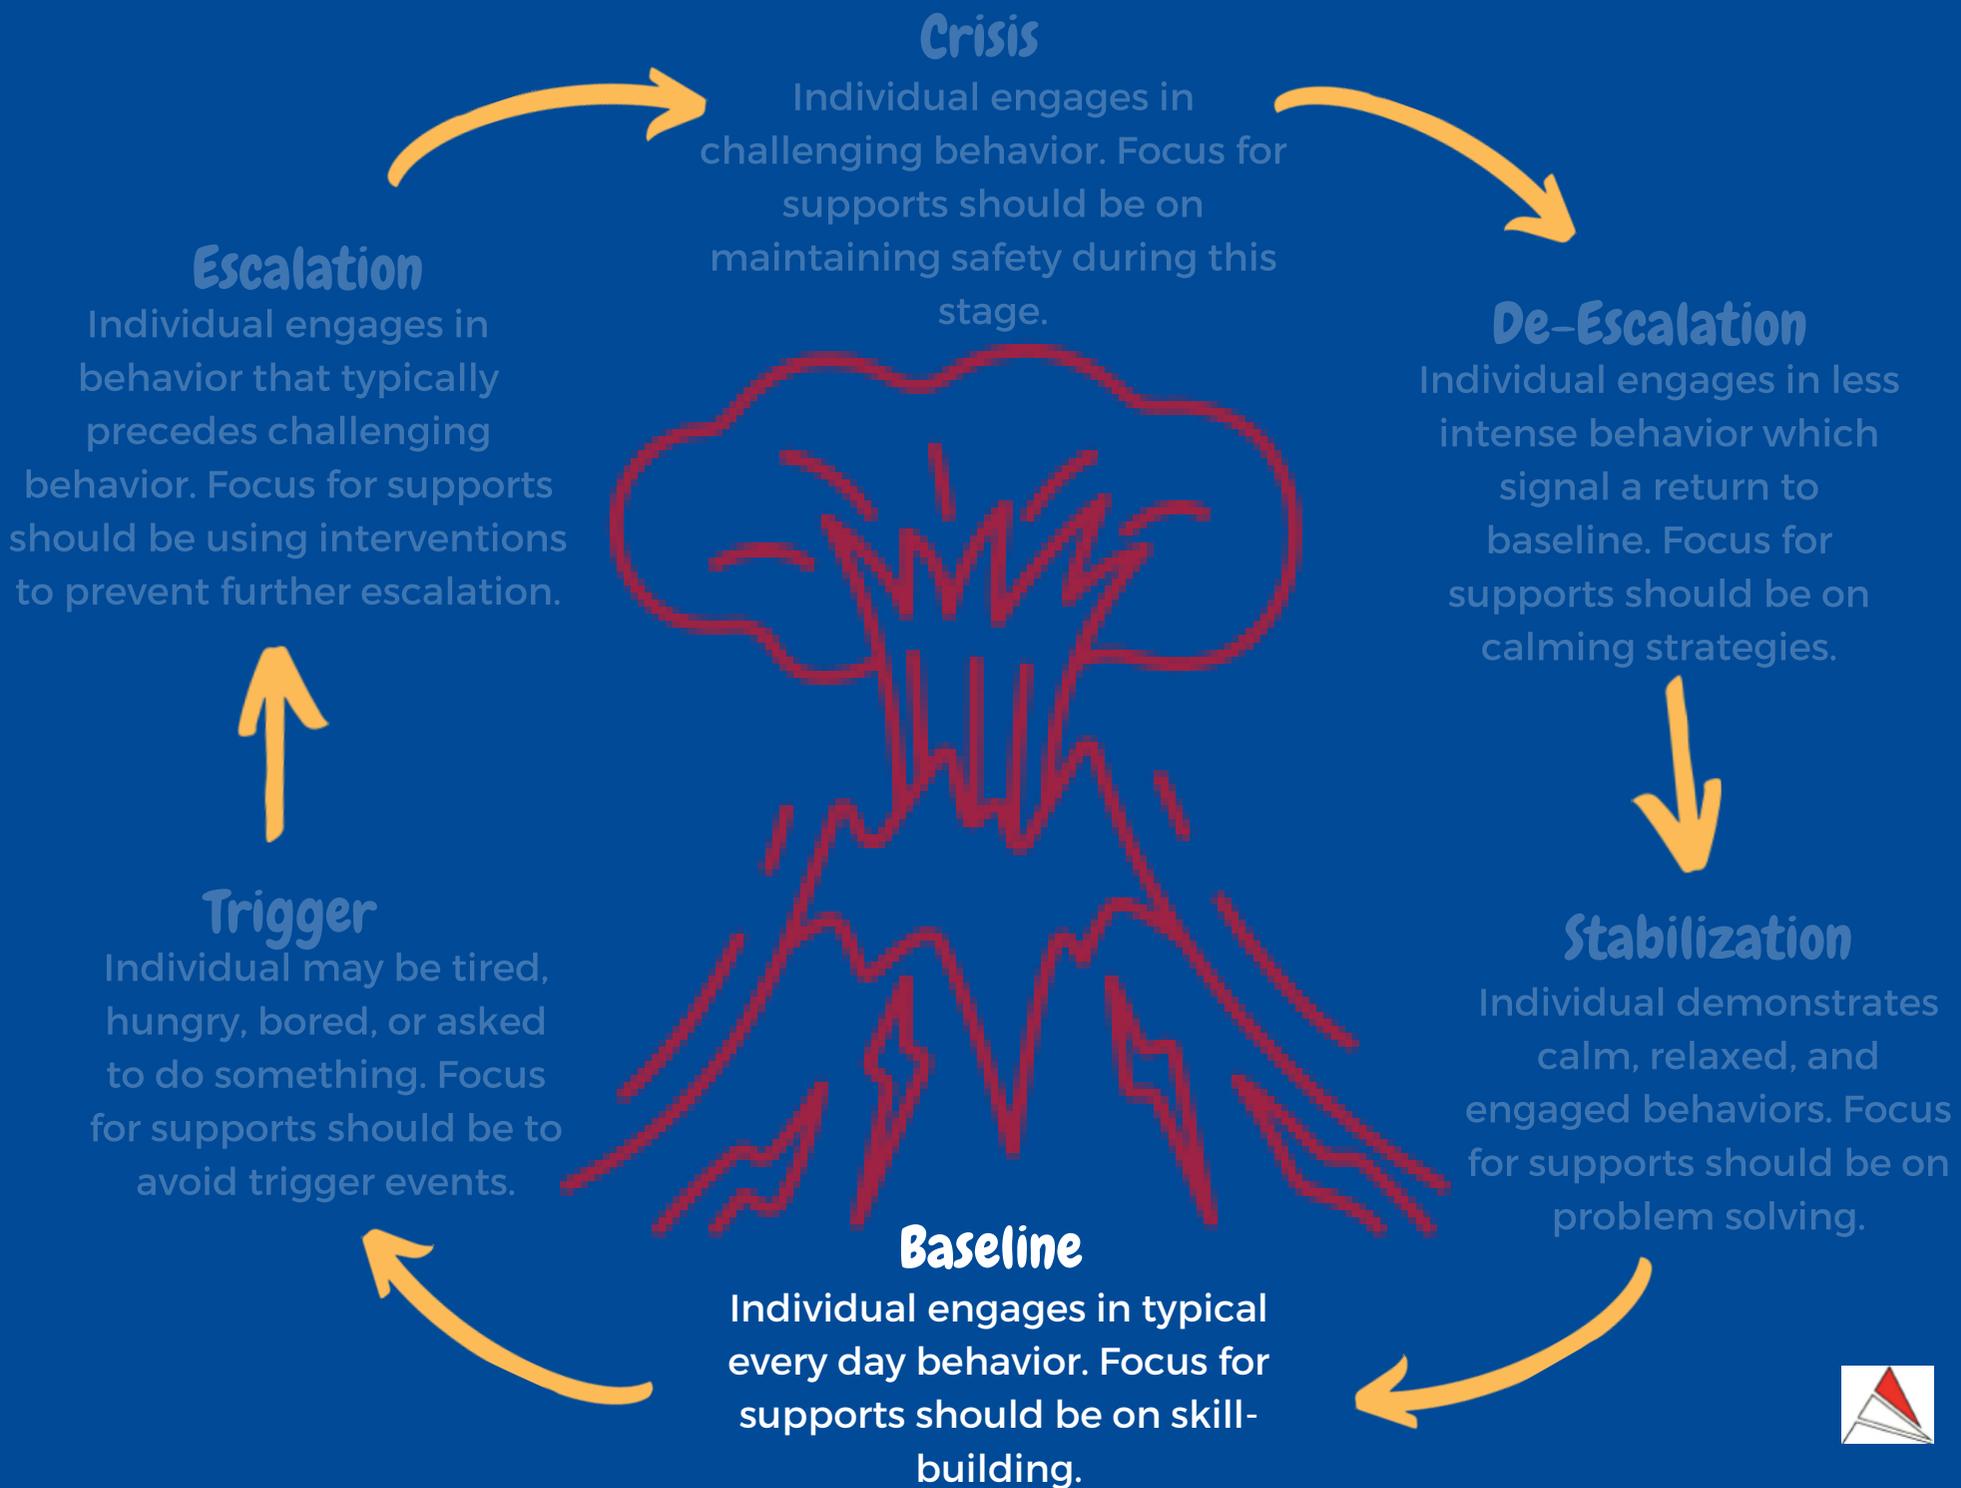

**De-Escalation**

**Trigger**

**Stabilization**

**Baseline**

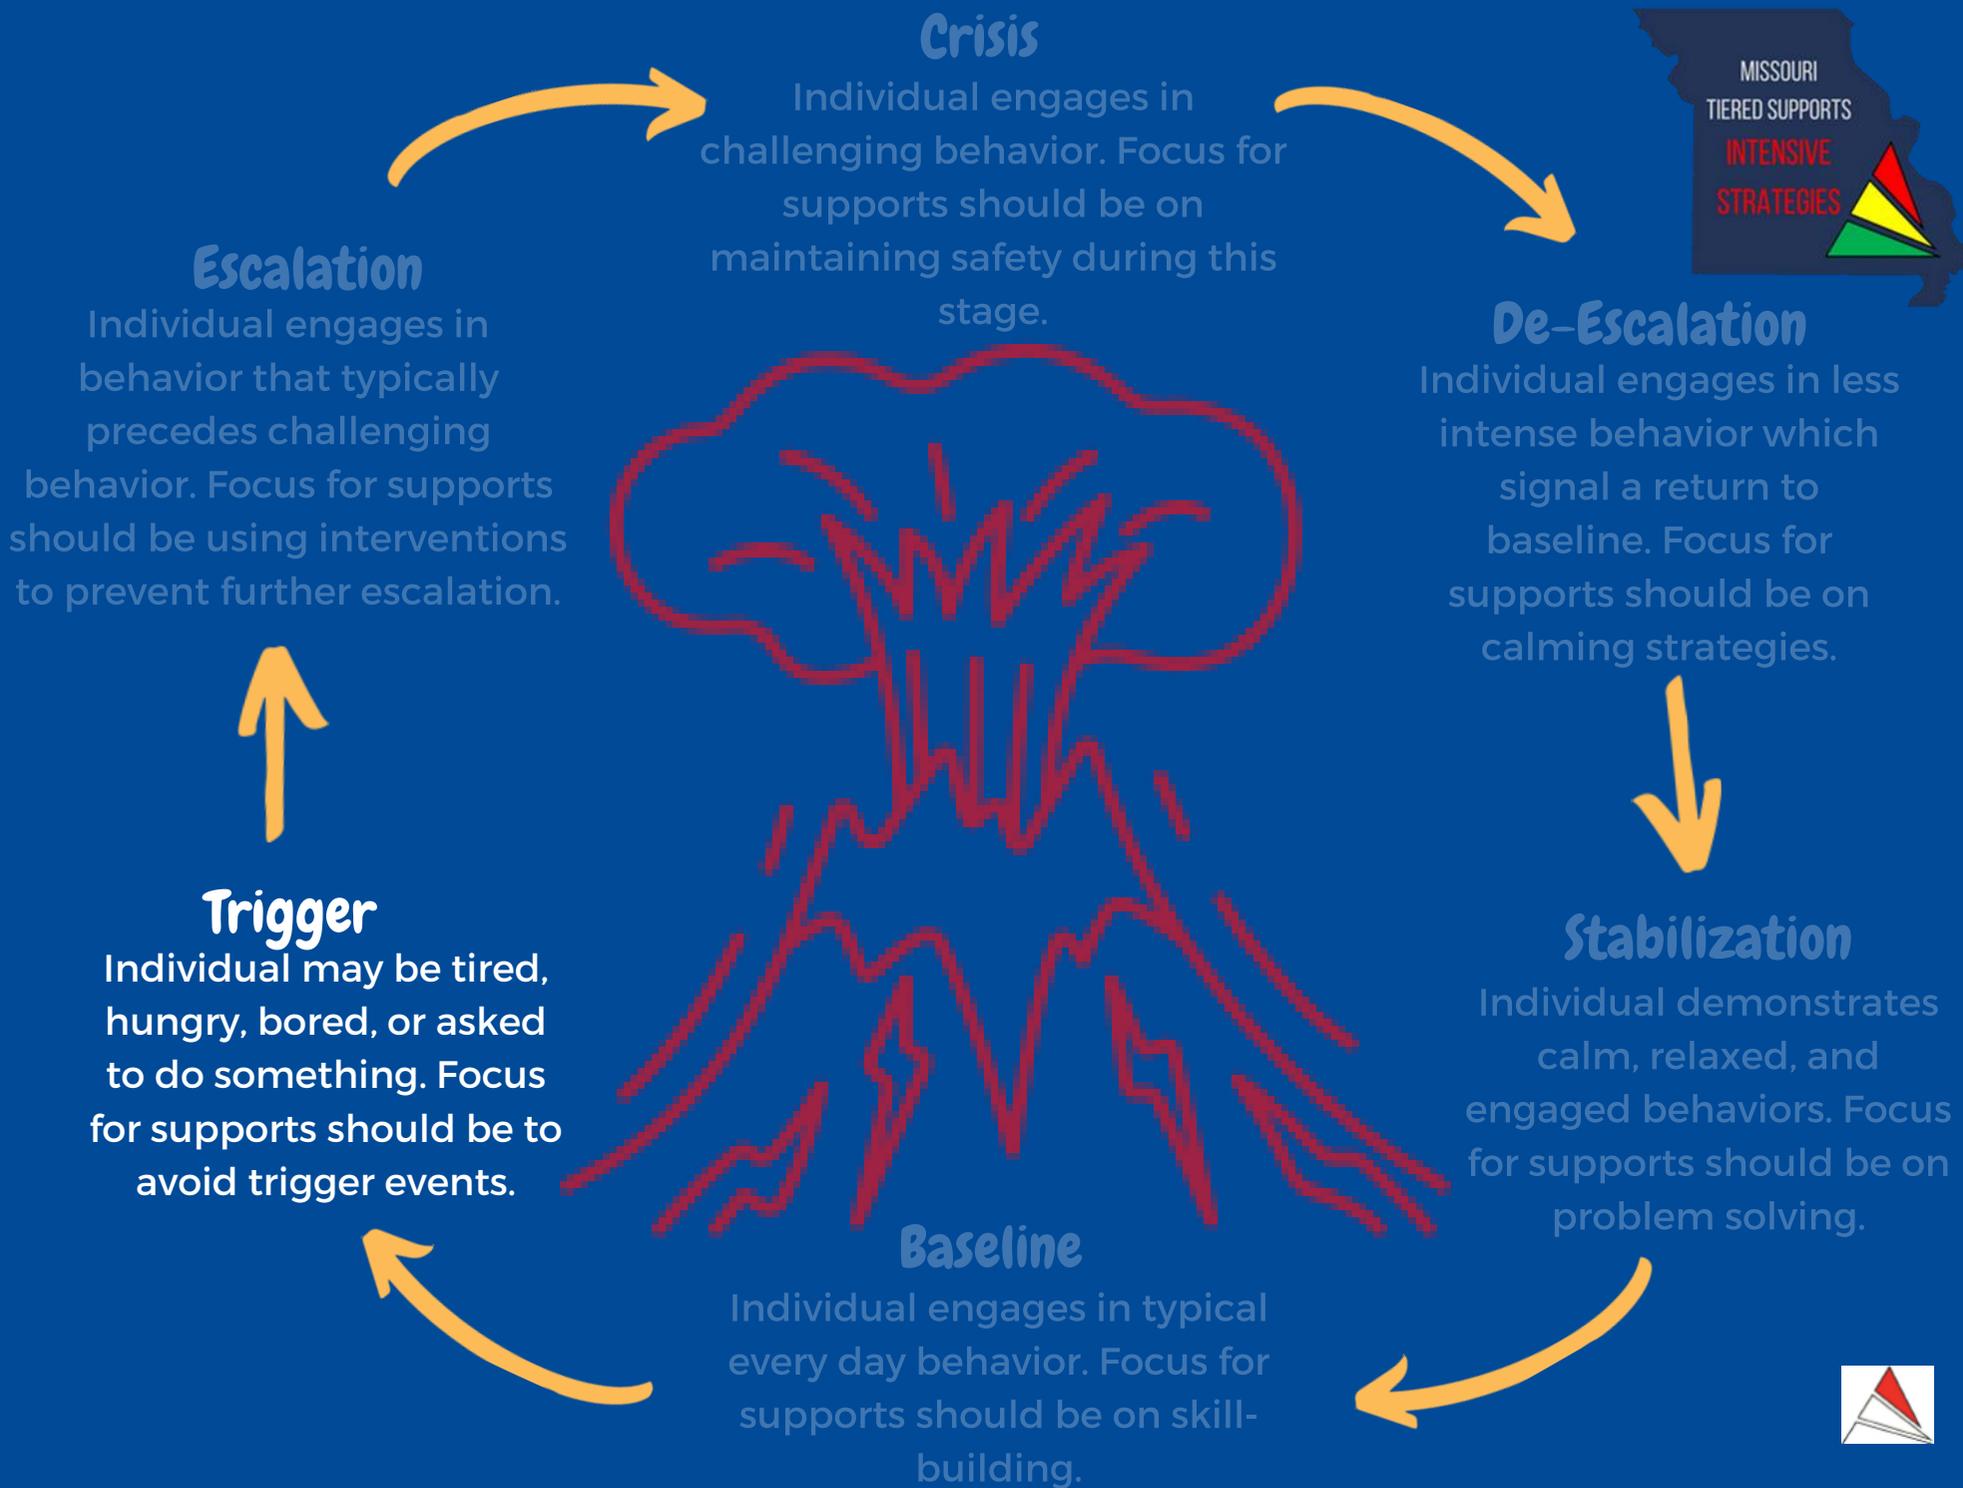

- Typical every day behavior.
- Supports should focus on skill-building.

# Baseline

- Individual bored, hungry, tired, asked to do disliked tasks.
- Supports focus on avoiding trigger events.

# Trigger

# Poll for You

## What is the definition of a trigger?

- A. Anything that makes a person happy
- B. Anything the creates a worsening for a person
- C. Anything that can help the person be successful
- D. Anything that creates skills for the person

*Type Your Response in the Chat*

# Poll for You

What is a definition of a trigger?

**B. Anything that creates a worsening for a person**

## Crisis

Individual engages in challenging behavior. Focus for supports should be on maintaining safety during this stage.

## De-Escalation

Individual engages in less intense behavior which signal a return to baseline. Focus for supports should be on calming strategies.

## Stabilization

Individual demonstrates calm, relaxed, and engaged behaviors. Focus for supports should be on problem solving.

## Baseline

Individual engages in typical every day behavior. Focus for supports should be on skill-building.

## Escalation

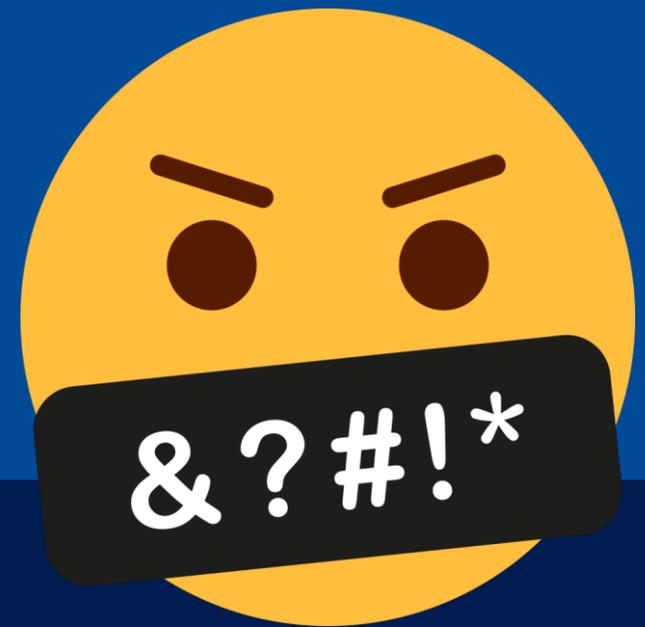

Individual engages in behavior that typically precedes challenging behavior. Focus for supports should be using interventions to prevent further escalation.

## Trigger

Individual may be tired, hungry, bored, or asked to do something. Focus for supports should be to avoid trigger events.

- Precursor behaviors
- Supports focus on implementing interventions to prevent further escalation.

# Escalation

## Crisis

Individual engages in challenging behavior. Focus for supports should be on maintaining safety during this stage.

## Escalation

Individual engages in behavior that typically precedes challenging behavior. Focus for supports should be using interventions to prevent further escalation.

## De-Escalation

Individual engages in less intense behavior which signal a return to baseline. Focus for supports should be on calming strategies.

## Trigger

Individual may be tired, hungry, bored, or asked to do something. Focus for supports should be to avoid trigger events.

## Stabilization

Individual demonstrates calm, relaxed, and engaged behaviors. Focus for supports should be on problem solving.

## Baseline

Individual engages in typical every day behavior. Focus for supports should be on skill-building.

- Challenging Behavior.
- Supports should focus on safety.

# Crisis

# Poll for You

**A crisis always happens the same way?**

- A. True**
- B. False**

*Type Your Response in the Chat*

# Poll for You

**A crisis always happens the same way?**

**B. False**

## Crisis

Individual engages in challenging behavior. Focus for supports should be on maintaining safety during this stage.

## De-Escalation

Individual engages in less intense behavior which signal a return to baseline. Focus for supports should be on calming strategies.

## Stabilization

Individual demonstrates calm, relaxed, and engaged behaviors. Focus for supports should be on problem solving.

## Baseline

Individual engages in typical every day behavior. Focus for supports should be on skill-building.

## Escalation

Individual engages in behavior that typically precedes challenging behavior. Focus for supports should be using interventions to prevent further escalation.

## Trigger

Individual may be tired, hungry, bored, or asked to do something. Focus for supports should be to avoid trigger events.

- Behavior is less intense.
- Supports should focus on calming strategies.

# De-escalation

# Poll for You

**A person may cycle between De-escalation and Crisis?**

- A. True**
- B. False**

*Type Your Response in the Chat*

# Poll for You

**A person may cycle between De-escalation and Crisis?**

**A. True**

## Crisis

Individual engages in challenging behavior. Focus for supports should be on maintaining safety during this stage.

## De-Escalation

Individual engages in less intense behavior which signal a return to baseline. Focus for supports should be on calming strategies.

## Stabilization

Individual demonstrates calm, relaxed, and engaged behaviors. Focus for supports should be on problem solving.

<p><b>What a good day looks like</b></p>	<p><b>What a bad day looks like</b></p>
<ul style="list-style-type: none"> <li>• Listening to music</li> <li>• Gets to stay home</li> <li>• Watching videos or wrestling</li> <li>• Experiences no struggles with staff</li> </ul>	<ul style="list-style-type: none"> <li>• People yelling</li> <li>• She doesn't want to get out of bed</li> <li>• Not listening to staff</li> </ul>

# Putting it all together

## A Case Study – About the Individual

### **Important to Person 1:**

Person 1's family is important to her - brother, mother, father, and stepmother vital tPerson 1 is allowed to visit with them and talk to them on the phone regularly. Person 1 has a stuffed animal, "Bun-Bun," that was given to her by her grandfather that she treasures. She likes holding Bun-Bun to feel happier and safer. Person 1 says it is important for her to have working internet. She also stated that it is important for her to watch wrestling. Her favorite wrestling group is the Riott Squad.

### **Important for Person 1:**

Person 1 does not like being bossed around. Sometimes she becomes upset with what she calls nagging. Using a calm voice works best in these situations. It is better to make requests than demands. Person 1 has difficulty being motivated and needs repetitive prompts to complete household and/or personal care tasks. It is recommended that staff give her a timeframe to complete chores such as "Sweep by 3:00 p.m." then allow Person 1 to do it at the time she wants. Staff can give her reminders every hour or so about how much time is remaining before the task should be done.

# **Putting it all together**

## **A Case Study – About the Individual**

It is important for Person 1 that she has alone time. She is currently working on knowing her breaking point, however, when she reaches her breaking point it is important that she can go to her room by herself to calm down. Staff should always knock before entering Person 1's room to respect her privacy and personal space. Some coping skills she found to be helpful include listening to music, jumping on her bed, reading, coloring, and writing stories, and poems.

Person 1 works best with staff who she has begun to know. Person 1 and her guardian both prefer her to work with female staff. She enjoys people who take the time to get to know her and who have a good sense of humor

### **Altered Levels of Supervision or Restrictions:**

**Restriction:** Person 1 receives 1:1 staffing for 24 hours a day.

# Putting it all together

## A Case Study – About the Individual

### **Behavioral and Mental Health:**

One of Person 1's biggest triggers is being told what to do, especially by staff. Person 1 has difficulty knowing when she is reaching her breaking point and will often have a breakdown after being told what to do. When Person 1 has a break down she will yell, stomp her feet, slam doors, and sometimes hit walls. In the past Person 1 would run away during a breakdown. Over the past year Person 1 worked on creating a list of coping skills to help her decompress. Some coping skills she found to be helpful include listening to music, jumping on her bed, reading, coloring, and writing stories and poems. Person 1's staff noticed she will have a breakdown when she is stalling and wanting to get out of doing something, such as her chores.

**Verbal Aggression:** Person 1 has a history of becoming upset and yelling/cursing, making detailed threats, intimidating, and bullying. Person 1's threats can include threats of bodily harm, threats toward roommate and staff, and threats to destroy their personal property. Staff will attempt to pivot her toward a desired activity and remove her from what is making her mad.

**Property Destruction:** Person 1 will occasionally hit walls when she is upset.

**Triggers:** Person 1 is triggered when she is told what to do by staff or her roommate. Person 1 does not like when people yell or when they're aggressive. Person 1 does not like having constant reminders to complete a task.

Staff can attempt to help Person 1 calm down by talking calmly to her and encouraging her to use one of her coping skills. Person 1 enjoys listening to music, jumping on her bed, reading, coloring, and writing stories and poems when she is upset. It is important for staff to allow Person 1 to have space to calm down.

# Putting it all together

## A Case Study – About the Individual

# Demographics and Identification

**Name:** Person 1

**DMH ID :** 12345

**Date of Plan Development:** 9.1.2023

**Supports/Provider/Program:** Lotus ISL

**Team members developing plan:** Person 1/Lotus ISL staff/SC Jane/Step Mom

**Parent or guardian involved in developing plan:** PA Carbon County

**Consent to use the plan given by (individual/ parent/guardian signature):** *PA Carbon County*

**Date parent/guardian provided consent to use:** 10.1.2023

## Putting it all together

# A Case Study – Writing the Safety Crisis Plan

# Assessment, Needs and Goals

## Crisis Safety Assessment Results:

*There are no identified health issues related to medications. Health issues would NOT preclude the individual from being physically restrained. Emergency service interactions of been minimal at this point in time (2 ED visits in the past year and 1 LE contact. Restraint occurs on average 3 times per month.*

*What to do – Allow her to complete things in her own time frame. Use supportive questioning (I.E. – Tell me more, Can you give me a better understanding of what is/was happening, ask before making physical contact/touching). Use a voice volume that could be identified as an “inside” voice. Try to regulate rate of speech at a moderate level. Be sure to check for understanding when interacting with her. More access to community services are needed in the area of identifying a counselor that is a good match for the individual. She has had competitive employment in a wedding shop in the past, the store went out of business and she is working with an employment specialist to find a similar position in a smaller retail store. Access to music and Bun-Bun are key to de-escalation and for avoiding escalation. Staff phones are to stay out of site and out of use.*

## Putting it all together

# A Case Study – Writing the Safety Crisis Plan

# Assessment, Needs and Goals

**Need(s) (Specific statement related to Necessity): (Example \_\_\_\_\_ needs help to interact with others without physical or verbal aggression. In the past these actions have resulted in (describe most severe results of episodes, list dates of most recent episodes):**

*Person 1 needs supports to identify what her triggers might be, what calming strategies are helping her to stay regulated so that she does not escalate to property destruction and verbal aggression especially in a community setting.*

*In the past year there were .....*

*NOTE: Provide summary information and data as there is limited value added to recreating information from monthly summaries or EMT reports*

## Putting it all together

# A Case Study – Writing the Safety Crisis Plan

# Assessment, Needs and Goals

**Support Plan Goal:** \_\_\_\_\_ (Example: will meet and participate in the after school program with no episodes of physical or verbal aggression)

*Person 1 will participate in community activities (shopping for personal items and groceries and during Special Olympics activities) with less than 10 incidents of verbal aggression and less than 2 incidents of property destruction for 3 consecutive months.*

*Person 1 will use her identify coping skills of keeping "Bun-Bun" with her, listening to music, jumping on her bed, reading, coloring, and writing stories, and poems, "Pick 5 and choose" or of "Name 3 thing that..." to support her to interact with others and to maintain property in tact (as it exists)*

*Person 1 is will identify the behaviors she can associate with her "breaking" point – Clenched teeth, heavy breathing, yelling, stomping her feet, slamming doors, hitting walls and ...*

## Putting it all together

# A Case Study – Writing the Safety Crisis Plan

# Behaviors, Triggers, Precursors and Escalation

**Problem Behaviors:** (specific, measurable, observable along with identification of frequency, intensity and duration):

*Verbal Aggression as evidenced by yelling/cursing, making detailed threats, (threats can include threats of bodily harm, threats toward roommate and staff, and threats to destroy their personal property) intimidating, and bullying.*

*Property Destruction as evidenced by the willful destruction of items or property*

*NOTE: Data should be provided here*

## Putting it all together

# A Case Study – Writing the Safety Crisis Plan

# Behaviors, Triggers, Precursors and Escalation

**Possible Trigger Events:(what might happen that could result in it more likely that he will become upset and engage in the problem behavior?)**

*Being told what to do*

*Questioning her in an accusatory way*

*People yelling*

*Technology problems/Internet going out*

*Being touched without asking*

**Possible precursor behaviors: (What might he do that tells you he is getting upset?)**

*Clenched teeth*

*Heavy breathing*

*Yelling*

*Stomping her feet*

*Slamming doors*

*Hitting walls*

## Putting it all together

## A Case Study – Writing the Safety Crisis Plan

# Behaviors, Triggers, Precursors and Escalation

**Criteria for directly addressing the problem behavior and Criteria for escalating safety intervention: (when do you move from prevention/de-escalation to trying to directly intervening or seeking assistance?)**

*If there is continuous yelling accompanied by stomping of feet, slamming doors and hitting walls for greater than 30 minutes then staff should change assignments. If this continues for an additional 30 minutes then call the program manager for additional coaching.*

*Intervene in behavioral interactions that has become aggressive and the behavior of an individual poses a threat of imminent harm to themselves and/ or others.*

## Putting it all together

# A Case Study – Writing the Safety Crisis Plan

# Documentation and Communication

**Documentation of implementation of plan: (describe how use of any of safety crisis plan will be documented):**

*Staff will take data on the following on the attached data sheets:*

*Use of coping strategies*

*Use of identifying breaking point behaviors and asking for assistance*

*Frequency and duration of events where there is yelling combined with other elements in excess of 15 minutes in duration*

*Events where property destruction exceeds 100.00*

**Communication of use of plan to other members of the team, including parents and support coordinator:**

**(describe how and by whom the use of plan will be communicated):**

*There will be a debriefing for each event that is in excess of 15 minutes or that results in property destruction in excess of 100.00 ;*

## Putting it all together

# A Case Study – Writing the Safety Crisis Plan

# Crisis Cycle Elements

<b>Baseline</b>		
<b>What behaviors does the individual engage in?</b>	<b>What should other people do?</b>	<b>What should other people avoid?</b>
Listening to music	Ask to enjoy the music with her, Respect her space if she wants to enjoy music alone	Commenting on the music choice, changing the music
Watch wrestling	Sit with her and cheer on her selected person	Don't cheer on the opponent, don't indicate she cannot watch it, don't comment that it is not real
<b>Triggers</b>		
<b>What are some trigger events? (list each one)</b>	<b>What should other people do?</b>	<b>What should other people avoid?</b>
The internet is down	Help her go through the checklist for internet operations that is on the refrigerator	Don't discredit the validity of her concern
Family member cannot come to visit	Have an alternative plan in place of a different activity to pursue	Don't "do" nothing
<b>Escalation</b>		
<b>What behaviors does the individual engage in?</b>	<b>What should other people do?</b>	<b>What should other people avoid?</b>
Stomping feet	Suggest to her to listen to music Make sure she has Bun-Bun	Telling her to stop
Yelling	Suggest to her to listen to music Make sure she has Bun-Bun	Telling her to stop

Putting it all together

A Case Study – Writing the Safety Crisis Plan

# Crisis Cycle Elements

<b>Crisis</b>		
<b>What behaviors does the individual engage in?</b>	<b>What should other people do?</b>	<b>What should other people avoid?</b>
<i>If there is continuous yelling accompanied by stomping of feet, slamming doors and hitting walls for greater than 30 minutes then staff should change assignments</i>	Switch off with other staff Give her space	Avoid a power struggle with her with the door trying to get her to stop Avoid being too close and hovering
<b>De-Escalation</b>		
<b>What behaviors does the individual engage in?</b>	<b>What should other people do?</b>	<b>What should other people avoid?</b>
Listening to music at a volume higher than normal	Give her space	Turning the music down, asking her to turn the music down
<b>Stabilization</b>		
<b>What behaviors does the individual engage in?</b>	<b>What should other people do?</b>	<b>What should other people avoid?</b>
Listening to music at an "normal" volume	Ask to enjoy the music with her, Respect her space if she wants to enjoy music alone	Commenting on the music choice, changing the music
