No Wrong Door Survey Opportunity

The enhancement of the No Wrong Door (NWD) framework in Missouri aims to simplify systems, making them more accessible for both professionals and individuals. The University of Missouri Kansas City - Institute for Human Development (UMKC-IHD) has designed a survey to gain insights into the existing roles, positions, and competencies within Missouri's systems of support to identify strengths and barriers that individuals and organizations face when navigating these systems. This [survey](#) is designed to be completed by providers/staff that are working directly with individuals with lived experience and their families/caregivers.

Survey closes April 1st, 2024.
