## Upcoming Webinar

### Supporting People with Complex Needs through Tiered Supports

May 9, 2024  
1:00 p.m.

Missouri Tiered Supports is implemented by the Department of Mental Health and is based on a public health model created by the Centers for Disease Control (CDC). This model supports the health of an entire population of people by providing a continuum of supports that are layered on top of one another as a person's needs increase. Learn more about how structuring supports by tiers relates to individuals, strategies, and organizations as a whole.

#### **Presenters:**

- Nicole Jones, Director of Risk Prevention
- Kathleen Deppeler, Director of Positive Supports
- Wendy Witcig, Deputy Division Director

#### **Target Audience:**

- Service Providers
- Support Coordinators
- DMH Team Members
