INTRODUCTION

An estimated one million Missouri adults (20.5% of all Missouri adults) and eight percent of Missouri adolescents had a substance use disorder during the past year. Over 1,250,000 adults experienced any mental illness, including 320,000 with serious mental illness. Nineteen percent of adolescents and nine percent of adults had a major depressive episode during the past year. Nearly one in ten Missouri adults had both a mental disorder and substance use disorder. These alarming Missouri estimates come from the 2023-2024 National Survey on Drug Use and Health.

The Missouri Department of Mental Health, Division of Behavioral Health manages programs that provide treatment and support services to more than 100,000 Missouri residents annually. This report includes an overview of that assistance to individuals with mental and substance use disorders.

Behavioral health disorders lead to unfortunate conditions and events that impact our daily lives. The Division of Behavioral Health wants to acknowledge and thank our colleagues from these agencies who developed and provided statewide and county-level data on some of these impacts:

Missouri Department of Corrections

Missouri Department of Health and Senior Services

Missouri Department of Mental Health

Missouri Department of Public Safety, Missouri State Highway Patrol

Missouri Department of Social Services

Missouri Institute of Mental Health

Missouri Office of State Courts Administrator

University of Missouri, Partners in Prevention Statewide Coalition
